Hard Bound Lab Manual Chemistry Neena Sinha, R Rangarajan, R P Manchanda, R K Gupta, Rajesh Kumar, Lab Manuals *Guided Inquiry Experiments for General Chemistry* Nancy K. Kerner, Ram S. Lamba, 2007-10-19

The use of the laboratory is a valuable tool in developing a deeper understanding of key chemical concepts from the experimental process. This lab manual encourages scientific thinking enabling readers to conduct investigations in chemistry. It shows how to think about the processes they are investigating rather than simply performing a laboratory experiment to the specifications set by the manual. Each experiment begins with a problem scenario and ends with questions requiring feedback on the problem

Green Chemistry Laboratory Manual for General Chemistry Sally A. Henrie, 2015-03-18

Green chemistry involves designing novel ways to create and synthesize products and implement processes that will eliminate or greatly reduce negative environmental impacts. Providing educational laboratory materials that challenge students with the customary topics found in a general chemistry laboratory manual, this lab manual enables students to see how green chemistry principles can be applied to real world issues. Following a consistent format, each lab experiment includes objectives, prelab questions and detailed step by step procedures for performing the experiments. Additional questions encourage further research about how green chemistry principles compare with traditional more hazardous experimental methods.
