1. 3 (p. 4)
Autonomy is the principle that states that the patient can make his or her own decisions about health care. This right extends to all health care workers, including physicians, and regardless of the health care worker's feelings about the effectiveness or necessity of

the treatment, it is ultimately the patient's right to refuse treatment.

2. 2 (p. 2)
It is the nurse's responsibility to collect holistic assessment data from multiple sources, communicate the data to appropriate health care providers, and evaluate patient responses to interventions. (1) Diagnosis is not the responsibility of the LPN/LVN. (3) (4) Accountability and safety are important functions of the nurse that relate to all aspects of nursing care, not just assessment.
3. 3 (pp. 1-2)
The state nurse practice act provides rules and regulations for every state identifying the roles a nurse can assume. (1) The Academy of Medical-Surgical Nurses professional organization represents the interests of nurses. (2) Health care institutions may provide further role delineation within the state nurse practice act. (4) The Standards of Practice and Educational Competencies of Graduates of Practical/Vocational Nursing Programs is published by NAPNES and defines LPN/LVN competencies.
4. 1, 3, 4, 5 (p. 4)
These are just some of the areas that nurses must become knowledgeable in to provide to assess, plan, care for, and evaluate patients. (2) and (6) are items that may be useful in the nurse's role but are not necessary in patient assessment.
5. 2, 3 (p. 4)

There are multiple correct answers to most ethical dilemmas, and the options must be discovered through a process to ultimately determine how to proceed. (1) (4) Although these may be moral conflicts and strong opinions on the dilemma, they are not relevant to identifying a solution. (5) Although time is of the essence, it should not be a consideration.

6. 1, 2, 4 (p. 5)
Nurses are at risk for committing a tort such as restraining or medicating a patient against his or her wishes, sharing personal patient information, or giving false information. (3) (5) (6) All examples represent situations where the patient's preferences and privacy were respected.
7. 2 (p. 5)
In this example, the nurse owed a duty to the patient and did not carry out that duty. The patient was injured by the nurse's negligence. (1) (3) (4) The remaining words all describe similar situations, but negligence is specific to medical and legal professionals.
8. 1, 3, 5, 6 (p. 7)
SBAR stands for situation, background, assessment, recommendation. (2) (4) These items are not part of the SBAR communication method.

Women Defendants and International Law Sheri Labenski, 2024-07-05 This book addresses the largely neglected place of women defendants in contemporary international criminal law beyond the construction of women as victims and asks what the analysis of women perpetrators defendants and suspects reveals about international criminal law the media and feminism The book uses the topic of women perpetrators defendants and suspects as a way to explore the concept of legal subjectivity via a gender analysis It highlights how women perpetrators defendants and suspects are

constituted through three spheres namely the areas of international criminal law the media and feminism In examining the relationship between women perpetrators defendants and suspects and each of these spheres the book exposes embedded gender biases and structural gender fractures These reveal that problematic assumptions about how gender operates in conflict are embedded in the very foundations of legal imaginations Ultimately the book argues that this has far reaching consequences beyond its impact on current understandings of armed conflict Rather these assumptions should be a concern for us all even in times of peace This book will be of use to legal academics and practitioners interested in gender within international criminal law as well as those concerned with contemporary feminist approaches to law **The Linton**
