political economy of finance This collection of 23 of the most influential articles published in the period 2000-2006 reflects two new trends: interest in international aspects of corporate finance, particularly specific to emerging markets; awareness of the importance of institutions in explaining global differences in corporate finance. In the last decade, financial economists have increasingly focused on the role of laws and institutions in explaining differences in financial development across countries. This collection will be of great use to readers interested in the emerging new paradigm in corporate governance.

Andrei Shleifer, Harvard University. Anybody seeking to understand corporate finance and corporate governance must read the papers in this book and the literature they have spawned. The financing of firms is based on contracts and the enforcement of those contracts. Without comparing firms under different contractual systems, therefore, it is impossible to grasp fully the key factors shaping the financing and behavior of firms.

Ross Levine, Brown University. This reader describes how law, property rights, and corporate governance contribute to financial development, as well as how private interest groups can block or support financial reform and thereby shape the financial development of countries. It is a must-read for any student of finance.

Raghuram Rajan, International Monetary Fund.

Industry 4.0 and the Digital Transformation of International Business Gurinder Singh, Richa Goel, Vikas Garg, 2023-03-01. The book throws light on the ongoing trends in international business, integration of information technology with global businesses, its role in value co-creation, resource integration, and service for service exchange. While discussing the issues of these areas, chapters of this book also delve into prevalent problematic areas which are closely related, like employment, ethical aspects, power, creation, and so on. Recognizing the role digitization and new technologies play in enabling global managers to communicate with the outside world directly via digital channels, irrespective of their location, which is especially true in time of COVID-19, the book takes an emerging economy perspective and throws light on new theories, perceptions, employment opportunities, and innovative ideas through its content. The book not only discusses effects of information technology but also the latest emerging technology in global business, like use of artificial intelligence, robotics, machine learning, big data, and their integration with the global business.

4.0 Since emergence of these new technologies requires proper infrastructural development, the book also throws light on government initiatives and CSR in this respect. It contains takeaways for both undergraduate and graduate students, researchers, and academicians, industry watchers, practitioners, start-ups, and entrepreneurs.
