Vocabulary: percent error, population, sample

Prior Knowledge Questions (Do these BEFORE using the Gizmo.)

1. A jar contains 100 marbles total. Some are black. If you pull 4 marbles out and 1 is black, how many out of the 100 marbles would you guess are black? I would guess around 25. Explain. The reason I would guess 25 is because $\frac{1}{4}$ is the ratio of black marbles to other marbles being pulled out of 100 and $\frac{1}{4}$ of 100 is 25.
2. A different jar has 100 black marbles. (The total number of marbles is unknown.) If you pull 4 marbles out and 1 is black, what is your guess for the total number of marbles? 400
Explain. I would say 400, because $\frac{1}{4}$ of 400 is 100.

Gizmo Warm-up

In the *Estimating Population Size* Gizmo, you will estimate the total number of fish in a pond. You will do this by tagging and releasing a certain number of fish, and then “recapturing” some.

To change the number of fish to tag or catch, drag the slider, or click on the number in the text field next to a slider, type a new value, and hit **Enter**.

1. Suppose a scientist tags 100 fish, and releases them. (Set the **Tagged fish in pond** to 100 to show this.) Later, a fisherman catches 50 fish from the same pond. (Set **Fish to catch** to 50 to show this.) The fisherman’s catch is a **sample** of all fish in the pond.
 - A. Click **Catch and check**. Look at the **Results** table. How many tagged fish did the fisherman catch? 19
 - B. What percent of the fish in his sample were tagged? 38%
2. At the bottom of the Gizmo, select **Show total fish in pond**. How many fish are in this

For instance, health risk behaviors such as sedentary behaviors e.g. binge watching TV and playing computer games, the use of alcohol, tobacco or other substances and lack of sleep have been found to negatively affect the physical and mental health of people. On the other hand, some studies show that health promoting behaviors such as physical activity and healthy dietary habits can mitigate or reverse the negative effects of health risk behaviors on health outcomes. In the meantime, some studies indicate that the harmful effects of some health risk behaviors may not be mitigated by health promoting behaviors. For instance, some studies show that sedentary behaviors and physical activity are independently associated with some physical and mental health outcomes. Interventions to increase physical activity with and without

decreasing sedentary time lead to different health outcomes Clearly more research is needed to show the interaction between health promoting behaviors and health risk behaviors in health which could shed light on the management of health related behaviors
