The Mindful Health Care Professional - E-Book Carmelina D'Arro, 2023-09-12 2025 PROSE Award Category Winner in Nursing Allied Health Services Selected for Doody's Core Titles 2024 in Patient Education Research shows that what makes or breaks the success of a health care professional is more than the ability to provide accurate

diagnosis and treatment An HCP's success hinges on their ability to satisfy patients' main concerns about HCPs: namely, do they care about me and will the procedure hurt? The Mindful Health Care Professional teaches HCPs how to train the mind to be calm, focused, and compassionate in ways that enhance their own well-being and their ability to provide patient-centered care. This book offers the core communication skills needed to convey care and build trust with a novel model that helps navigate challenging procedures and consultations. Finally, it contains many simple, evidence-based techniques for managing pain and anxiety during medical and dental procedures, allowing procedures to unfold more easily for all. Written by Dr. Carmelina D'Arro, a seasoned health care professional and qualified mindfulness teacher, this state-of-the-art guide is designed for students in all areas of health care and includes a fully searchable eBook version with each print purchase that provides links to numerous videos. Patient-centered care approach utilizes the ISLEEP model: Introduce, Solicit, Listen, Empathize, Explain, and Power, which encompasses not only consultations but also hands-on procedures. Trauma-sensitive mindfulness practices are tailored to health care professionals and patients and help in integrating EASE: equanimity, attentiveness, self-awareness, and empathy into practice. Evidence-based interventions are based on current pain theory and include mindfulness techniques, non-pain stimuli, and active distraction. Case studies highlight challenging situations faced by health care professionals and patients and how to navigate them with ISLEEP communication skills. Procedure videos provide step-by-step instructions on how to practice mindfulness and other mind-training techniques. Focus on practical application includes opportunities for observation, videos, practice simulation exercises, and self-evaluation. Clinical tools: More than 20 videos demonstrate the ISLEEP method and how to implement it with patients and staff. Over 20 videos demonstrate interventions for procedural pain and anxiety. Tables and Figures highlight key research and concepts throughout the book. eBook version is included with print purchase. The eBook allows you to access all of the text, figures, and references with the ability to search, customize your content, make notes and highlights, and have content read aloud. It also includes videos of meditation practices, communication skills, and interventions for procedural pain and anxiety.

Cultivating Professional Resilience in Direct Practice Jason M. Newell, 2017-09-26 Overwhelming empirical evidence indicates that new social workers particularly those going into child welfare or other trauma related care will discover emotional challenges including the indirect or secondary effects of the trauma work itself professional burnout and compassion fatigue However the newly revised CSWE Educational Policy and Accreditation Standards EPAS does not mandate the inclusion of content related to self care in social work curriculum or field education In a textbook that bridges the gap between theoretical and pragmatic approaches to this important issue in human service work Jason M Newell provides a potential resolution by conceptualizing self care as an ongoing and holistic set of practice behaviors described as the key to professional resilience To address the effects of trauma related care on direct practitioners Newell provides a comprehensive competency based model for professional resilience examining four key constructs stress empathy resilience and self care from a range of theoretical dimensions For those who work with vulnerable populations the tendency to frame self care solely within organizational context overlooks the importance of self care in domains beyond the agency setting Alternatively he uses a framework grounded in the ecological systems perspective conceptualizing self care as a broader set of practice behaviors pertaining to the whole person including the physical interpersonal organizational familial and spiritual domains of the psychosocial self Alongside professional self care practices at the organizational level Newell makes a case for the pragmatic role of recreational activities time with family and friends physical health spirituality and mindfulness The application of a comprehensive approach to self care practice has potential to empower practitioners to remain resilient and committed to the values mission and spirit of the social work profession in the face of trauma
