The Journal of Intelligence History , *California in a Time of Excellence* James Andrew LaSpina,2009-02-26 California in a Time of Excellence follows the Golden State s efforts to reform its public school system from 1983 to the present Beginning with progressive curriculum reform initiatives that were launched even before the National Commission on Excellence in Education NCEE issued A Nation at Risk in 1983 James Andrew LaSpina traces these reform efforts through recurring culture wars major clashes of personality and a conflict between the state s tradition of progressive educational

policy and a culture of conservatism that colored much of the so called Left Coast s history since the sixties While the battles over curriculum reform in California reflect those at the national level the political world surrounding this conflict reveals the enormous significance of the conflict and its implications for our national future

The Draft, 1940-1973 George Q. Flynn, 1993 Individual liberty is ingrained in American culture Yet in contrast to this cherished ideal American men were inducted into military service under a system that flourished for more than twenty years before its rationalization was seriously questioned by more than a small minority of citizens Analyzing this paradox George Flynn provides the first comprehensive look at an institution that managed to sustain political and public favor through two wars before dying out under a barrage of protests during a third Placing the American draft within a historical context he shows how social and political considerations determined the character of conscription in the United States The draft developed as it did he argues not mainly because of military needs or strategy but because of political decisions initiated by civilians with nonmilitary agendas Explaining why the draft remained relatively immune to political criticism prior to the Vietnam conflict Flynn chronicles the draft s military and strategic successes and failures in America s mid century wars He shows how major institutions and lobbies representing science education and various professions and religions influenced it and how ultimately and ironically the selective character of the draft eventually made the system inequitable and helped cause its downfall
