National Identity in Contemporary Australian Opera Michael Halliwell, 2017-09-11 Opera has been performed in Australia for more than two hundred years yet none of the operas written before the Second World War have become part of the repertoire. It is only in the late 1970s and early 1980s that there is evidence of the successful systematic production of indigenous opera. The premiere of *Voss* by Richard Meale and David Malouf in 1986 was a watershed in the staging and reception of new opera and there has been a diverse series of new works staged in the last thirty years not only by the national company but also by thriving regional institutions. The emergence of a thriving operatic tradition in contemporary Australia is inextricably enmeshed in Australian cultural consciousness and issues of national identity. In this study of eighteen representative contemporary operas Michael Halliwell elucidates the ways in which the operas reflect and engage with the issues facing contemporary Australians. Stylistically these eighteen operas vary greatly. The musical idiom is diverse ranging from works in a modernist idiom such as *The Ghost Wife*, *Whitsunday*, *Fly Away*, *Peter Black*, *River and Bride* of *Fortune to Voss*, *Batavia*, *Bliss*, *Lindy*, *Midnight Son*, *The Riders*, *The Summer of the Seventeenth Doll* and *The Children's Bach* being works which straddle several musical styles. A number of operas draw strongly on musical theatre including *The Eighth Wonder*, *Pecan Summer*, *The Rabbits* and *Cloudstreet* and *Love in the Age of Therapy* is couched in a predominantly jazz idiom. While some of them are overtly political all at least tangentially deal with recent cultural politics in Australia and offer sharply differing perspectives.

Animals and Science Fiction

Nora Castle, Giulia Champion, 2024-03-22 *Animals and Science Fiction* is the first edited collection to be published focusing on the intersection of animal studies and science fiction studies. It offers a broad range of theoretical approaches and primary source texts including novels, short stories, poetry, film and TV, photography, erotica, video games and urban planning documents that explore the ways works of science fiction can transform how we see and interact with nonhuman others. With an eye toward more just multispecies futures, it argues that speculative imaginaries can be pivotal in changing attitudes toward and understandings of nonhuman animals in our world today. Chapters appeal to those interested in biopolitics, posthumanism, new materialism, ecocriticism and the environmental humanities, ocean humanities, postcolonial studies, critical race studies, Indigenous studies, global sf studies, film studies and food studies. Taken together, the collection works to showcase a diverse and growing field of scholarly inquiry into animals and science fiction.
