Value and Waste in Lean Construction Fidelis A.

Emuze,Tarcisio A. Saurin,2015-11-06 Non value adding activities are otherwise known as waste in the lean construction

lexicon The aim of this collection is to build a common understanding of the role and contribution of value adding activities in achieving stipulated objectives and continuous improvement in construction projects and to contrast this with waste

Although the lean approach to construction projects has been widely covered this is the first book that explicitly provides the link between value and waste in the Architecture Engineering and Construction AEC sector This internationally researched collection seeks to create a paradigm shift which will shape work processes and future directions for how value is

conceptualized and operationalized in both the project management and business aspects of construction The readers will

gain an understanding of The value adding paradigm in construction How to make value supporting decisions Waste

identification and control in practice With contributions from South Africa Brazil Norway and the USA the implications of this book are globally relevant This is essential reading for all higher level students of construction management and economics

and all professionals interested in value management
