Manual for the USES General Aptitude Test Battery: Development United States Employment Service, 1979

The Western World: Picturesque Sketches of Nature and Natural History in North and South America William Henry Giles Kingston, 1884-01-01 In the following pages I have endeavoured to give in a series of picturesque sketches a general view of the natural history as well as of the physical appearance of North and South America I have first described the features of the country then its vegetation and next the wild men and the brute creatures which inhabit it However I have not been bound by any strict rule in that respect as my object has been to produce a work calculated to interest the family circle rather than one of scientific pretensions I have endeavoured to impart in an attractive manner information about its physical geography mineral riches vegetable productions and the appearance and customs of the human beings inhabiting it But the chief portion of the work is devoted to accounts of the brute creation from the huge stag and buffalo to the minute humming bird and persevering termites introduced not in a formal way but as they appear to the naturalist explorer to the traveller in search of adventures or to the sportsman with descriptions of their mode of life and of how they are found hunted or trapped I have described in the same way some of the most remarkable trees and plants and from the accounts I have given I trust that a knowledge may be obtained of the way they are cultivated and how their produce is prepared and employed Thus I hope that with the aid of the numerous illustrations in the work a correct idea will be gained of the wilder and more romantic portions of the great Western World
