15 Courses In Sandf:

South Africa's Post-Apartheid Military Lindy Heineken, 2020-01-01 This timely book examines how the South African National Defence Force has adapted to the country's new security political and social environment since 1994. In South Africa's changed political state, how has civilian control of the military been implemented and what does this mean for defence in a democracy? This book presents an overview of the security environment, how the mission focus of the military has changed and the implications for force procurement, force preparation, force employment and force sustainability. The author addresses other issues such as the effect of integrating former revolutionary soldiers into a professional armed force, the effect of affirmative action on meritocracy, recruitment and retention, military veterans looking at the difficulties they face in reintegrating back into society and finding gainful employment, gender equality and mainstreaming, the rise of military unions and why a confrontational instead of a more corporatist approach to labour relations has emerged, HIV/AIDS and the consequences this holds for the military in terms of its operational effectiveness. In closing, the author highlights key events that have caused the SANDF to become lost in transition and transformation, spelling out some lessons learned. The conclusions she draws are pertinent for the future of defence security and civil-military relations of countries around the world.

WITS: The 'Open' Years Bruce Murray, 2022-09 In the period between the outbreak of World War II in 1939 and the enactment of university apartheid by the Nationalist Government in 1959, the University of the Witwatersrand, Johannesburg (Wits) developed as an open university admitting students of all races. This, the second volume of the history of Wits by historian Bruce Murray, has as its central theme the process by which Wits became open, the compromises this process entailed and the defence the University mounted to preserve its open status in the face of the challenges posed by the Nationalist Government. The University's institutional autonomy is highlighted by Yunus Ballim in his preface to the centenary edition of *WITS: The Open Years*. He writes: 'The emerging posture of a university willing to rise in defence of academic freedom was important because this was to become infused into the institutional culture of Wits. The book looks at the University's role in South Africa's war effort, its contribution to the education of ex-volunteers after the war, its leading role in training job-seeking professionals required by a rapidly expanding economy and the rise of research and postgraduate study. Students feature prominently through their political activities, the flourishing of a student intelligentsia, the heyday of the Remember and Give Rag, parade rugby, intervarsity and the stunning success of Wits sportsmen and women. *WITS: The Open Years* paints a vivid picture of the range of personalities who enlivened the campus among them some well-known figures in the new South Africa. The book includes chapters by Alf Stadler, who was Professor of Political Studies at Wits and the author of *The Political Economy of Modern South Africa*, and Jonty Winch, former Sports Officer at Wits and the author of *Wits Sport*. Armies and Democracy in the New Africa Kent Hughes Butts, 1996 In October 1994, the Strategic

Studies Institute sponsored a roundtable on democratization in Sub Saharan Africa Particular attention was paid to the role the U S military and Department of Defense played in democracy support This study developed from a paper presented at the roundtable Dr Butts and Dr Metz reject the notion that the political culture of African states allows or even encourages military intervention in politics Drawing on case studies from Nigeria and South Africa they contend that if the fragile democracies in Sub Saharan Africa are to be sustained African militaries must be extricated from politics and take decisive steps toward the type of military professionalism seen in stable democracies around the world U S national interests in Sub Saharan Africa are so limited that the region will receive only a very small proportion of the human political military and economic resources devoted to American national security strategy This makes efficiency imperative Dr Butts and Dr Metz argue that if U S strategic resources are used wisely in Africa they can have the desired effect In particular the U S military can play an important part in helping African militaries professionalize They close with concrete proposals through which the U S Department of Defense and the Army could more effectively support African democratization

Making Peace with Your Enemy Lætitia Bucaille, 2019-06-14 Reconciliation between political antagonists who went to war against each other is not a natural process Hostility toward an enemy only slowly abates and the political resolution of a conflict is not necessarily followed by the immediate pacification of society and reconciliation among individuals Under what conditions can a combatant be brought to understand the motivations of his enemies consider them as equals and develop a new relationship going so far as to even forgive them By comparing the experiences of veterans of the South African and Franco Algerian conflicts Laetitia Bucaille seeks to answer this question She begins by putting the postconflict and postcolonial order that characterizes South Africa France and Algeria into perspective examining how each country provided symbolic and material rewards to the veterans and how past conflict continues to shape the present Exploring the narratives of ex combatants Bucaille also fosters an understanding of their intimate experiences as well as their emotions of pride loss and guilt In its comparative analysis of South Africa and Algeria *Making Peace with Your Enemy* reveals a paradox In Algeria the rhetoric of the regime is characterized by resentment toward colonizing France but relations between individuals Reconciliation are warm However in South Africa democratization was based on official reconciliation but distance and wariness between whites and blacks prevail Despite these differences Bucaille argues South African Algerian and French ex adversaries face a similar challenge how to extricate oneself from colonial domination and the violence of war in order to build relationships based on trust

Community Rights, Conservation and Contested Land Fred Nelson, 2010-08-12 Natural resource governance is central to the outcomes of biodiversity conservation efforts and to patterns of economic development particularly in resource dependent rural communities The institutional arrangements that define natural resource governance are outcomes of political processes whereby numerous groups with often divergent interests negotiate for access to and control over resources These political processes determine the outcomes of resource governance reform efforts such

as widespread attempts to decentralize or devolve greater tenure over land and resources to local communities This volume examines the political dynamics of natural resource governance processes through a range of comparative case studies across east and southern Africa These cases include both local and national settings and examine issues such as land rights tourism development wildlife conservation participatory forest management and the impacts of climate change and are drawn from both academics and field practitioners working across the region Published with IUCN The Bradley Fund for the Environment SASUSG and Norwegian Ministry of Foreign Affairs

Apartheid Guns and Money Hennie van Vuuren, 2019-03-01 In its last decades the apartheid regime was confronted with an existential threat While internal resistance to the last whites only government grew mandatory international sanctions prohibited sales of strategic goods and arms to South Africa To counter this a global covert network of nearly fifty countries was built In complete secrecy allies in corporations banks governments and intelligence agencies across the world helped illegally supply guns and move cash in one of history's biggest money laundering schemes Whistleblowers were assassinated and ordinary people suffered Weaving together archival material interviews and newly declassified documents **Apartheid Guns and Money** exposes some of the darkest secrets of apartheid's economic crimes their murderous consequences and those who profited heads of state arms dealers aristocrats bankers spies journalists and secret lobbyists These revelations and the difficult questions they pose will both allow and force the new South Africa to confront its past
