The Southern African Development Community in Zimbabwe Rich Mashimbye, 2024-02-13 This book narrates the unravelling of Zimbabwe a country that was once considered an inspiration on the continent of Africa in terms of socioeconomic development Recognising that many factors contributed to the collapse of the nation and that this collapse was a process that occurred over a long period it looks at historical events and processes like the colonisation of the country and dispossession of the indigenous people and the misrule politically motivated violence and economic mismanagement that followed under Robert Mugabe as the pivotal moments that precipitated the subsequent fall of Zimbabwe The book also examines the role that the regional intergovernmental organisation the Southern African Development Community SADC played in trying to help Zimbabwe overcome its security political and economic challenges

Trade in Zimbabwe Richard Newfarmer, Martha Denisse Pierola, 2015-05-26 In Zimbabwe trade has been a driver of economic growth rising incomes and progressive empowerment of Zimbabweans through rising standards of living and the promise of better jobs Since 1980 through good years and bad years increases in exports have been positively associated with increases in national income Zimbabwe's location and resource base together with a low cost but relatively well educated labor force have endowed it with a naturally high trade ratio built on a diversified base that facilitates using trade as an engine of growth While trade volumes have rebounded smartly from the deep recession of 2007 2008 these do not offset other worrisome longer term trends Export growth during the last decade has been lacklustre and failed to drive high growth Agricultural exports other than tobacco have lost their once dominant role in the region and are no longer a source of diversification Manufacturing has withered in a continuing secular decline Zimbabwe's export basket has become less diversified and more dependent on a narrow range of mineral and to a lesser extent agricultural products In short exports have become less diversified less technologically sophisticated and less labor intensive and ever more dependent on a few large mining activities to provide foreign exchange and employment This report traces the roots of this poor performance to several policy issues poor predictability of macroeconomic policy and economic governance has created an unfavorable climate for private investment and trade a tariff structure that dampens export profitability industrial policies indigenization policy in particular that undermine investor confidence and inhibits private investment and finally competition limiting policies toward services that limit connectivity of Zimbabweans and raise trade costs The good news arising from the study is that the remedies for these policy shortcomings lie in Zimbabwean hands If the government were to adopt reforms that reconfigure economy wide incentives and trade and industrial policies it could promote sustained growth economic diversification and empowerment of poor people

Social Welfare and Social Work in Southern Africa Ndangwa Noyoo, 2021-06-11 This book is written by Southern African social welfare social work social development social security and social policy academics practitioners and advocates who have varying degrees of experience

The authors who contributed chapters to this book added their perspectives to ongoing debates about academic areas in the region. Thus the book's primary objective is to discuss the development of social welfare and social work in Southern Africa. In doing so it endeavours to contribute to the existing body of knowledge on social welfare and social work in the region. The chapters are examined through different theoretical lenses and historical perspectives. In this book African scholars, academics and practitioners provide a deep and critical reflection of social welfare, social work and related disciplines during the colonial and post colonial era, a period characterised by a deliberate move by Africa's political administrations to focus on nation building and to attempt to make Africa a global player. Despite being endowed with rich natural resources like minerals, agriculture and solid family and extended family life, the continent is weak globally. Furthermore, the book focuses on the pre colonial period, a golden thread running through the chapters. The book discusses the colonial era when Western countries captured and oppressed Africa, characterised the continent's history. This book is an appropriate publication at this point in our history, a resource that can be used to generate appropriate narratives and questions within the social welfare and social development sector, particularly on delivery, education and training.

Why Mugabe Won Stephen Chan, Julia Gallagher, 2017-06-09. This book examines the key events, personalities and wider socio-political context that led to Mugabe's victory in the 2013 Zimbabwean elections.

Political Economy of Post-apartheid South Africa Gumede, Vusi, 2017-05-05. The book, made up of three parts, covers a wide spectrum of political economy issues on post-apartheid South Africa. Although the text is mainly descriptive to explain various areas of the political economy of post-apartheid South Africa, the first and the last parts provide illuminating insights on the kind of society that is emerging during the twenty-one years of democracy in the country. The book discusses important aspects of the political history of apartheid South Africa and the evolution of post-apartheid society, including an important recap of the history of southern Africa before colonialism. The text is a comprehensive description of numerous political economy phenomena since South Africa gained its political independence and covers some important themes that have not been discussed in detail in other publications on post-apartheid South Africa. The book also updates earlier work of the author on policy and law making, land and agriculture, education and training, as well as on poverty and inequality in post-apartheid South Africa, thereby providing a wide-ranging overview of the socio-economic development approaches followed by the successive post-apartheid administrations. Interestingly, three chapters focus on various aspects of the post-apartheid South African economy: economic policies, economic empowerment and industrial development. Through the lens of the notion of democratic developmental state and taking apartheid colonialism as a point of departure, the book suggests that so far post-apartheid South Africa has mixed socio-economic progress. The author's extensive experience in the South African government ensures that the book has policy relevance while it is also theoretically sound. The text is useful for anyone who wants to understand the totality of the policies and legislation as well as the political economy interventions pursued since 1994 by the South African Government.
