Transforming Research Excellence McLean, Robert ,Tijssen, Robert,Wallace, Matthew L.,Kraemer-Mbula, Erika,2020-01-18 Modern day science is under great pressure A potent mix of increasing expectations limited resources tensions between competition and cooperation and the need for evidence based funding is creating major change in how science is conducted and perceived Amidst this perfect storm is the allure of research excellence a concept that drives decisions made by universities and funders and defines scientists research strategies and career trajectories But what is excellent science And how to recognise it After decades of inquiry and debate there is still no satisfactory answer Are we asking the wrong question Is reality more complex and excellence in science more elusive than many are willing to admit And how should excellence be defined in different parts of the world particularly in lower income countries of the Global South where science is expected to contribute to pressing development issues despite often scarce resources Many wonder whether the Global South is importing with or without consenting the flawed tools for research evaluation from North America and Europe that are not fit for purpose This book takes a critical view of these issues touching on conceptual issues and practical problems that inevitably emerge when excellence is at the center of science systems Emerging from the capacity building work of the Science Granting Councils Initiative in sub Saharan Africa it speaks to scholars as well as to managers and funders of research around the world Confronting sticky problems and uncomfortable truths the chapters contain insights and recommendations that point towards new solutions both for the Global South and the Global North

Tadesse Woldegiorgis, Logan Govender, Dennis Zami Atibuni, 2024-11-05 This book critically interrogates the notion of transformation in higher education focusing on epistemological and structural issues in postcolonial and contemporary Africa. The book considers the multifaceted challenges facing higher education in the continent and uses the concept of transformation as a common thread weaving through a range of issues including epistemology, identity, relevance, research, collaboration, and decoloniality. Arguing for a holistic approach towards progressive and innovative education systems, the book calls for a fundamental transformation that expands access, enhances quality and competitiveness, addresses past injustices, and improves the capacity to act together for a more sustainable and just future.
