The Economics of Defense Industry Thomas-Durell Young,2023-10-17 This book on the economics of defence industry assesses a series of historical and contemporary case studies that consistently demonstrate the need for governments to recognise and thereafter factor the financial needs of a narrow industrial sector that is capital intensive technologically advanced and that requires a highly skilled labour force Since the end of the cold war Western governments have systematically reduced financial support to their domestic defence industry and have seemingly ignored planning and funding industrial mobilisation In all cases government policy has been to encourage industries to consolidate capacity to become financially viable in a sector that has seen diminished demand The 2022 Russian invasion of Ukraine has caused Western governments to reassess their previous assumptions Efforts to increase industrial capacity have been met with the iron laws of economics whereby businesses need to show return on investments The chapters in this volume posit that efforts to rationalise industrial capacity and innovation to meet short term financial efficiencies inevitably results in limited expensive and long delays in increased production in times of international crisis This book serves as an essential guide for academics researchers and students interested in defence economics industrial economics international relations and industrial policy The chapters in this book were originally published in various issues of Defense Security Analysis

The South African Response to COVID-19 Pieter Fourie,Guy Lamb,2023-03-28 This book analyses the first two years of South Africa s response to the COVID 19 epidemic from its emergence in early 2020 Drawing on the perspectives of a range of public health experts economists and other social scientists and development practitioners this book argues that understanding this early response will be essential to moderate and improve future policy thinking around health governance and epidemic readiness This book provides a systemic analysis of not only the epidemiological progression of COVID 19 in South Africa but also the socio political factors that will be key in determining the future of the country as a whole including health system challenges socio economic disparities and inequalities and variable often contradictory and tardy policy responses Overall this book exposes Manichean thinking and the spurious policy dichotomies that pitch public health against human rights economic recovery against viral vector control and science against ideology with lessons not just for South Africa but also for elsewhere on the African continent and beyond This book will be perfect for researchers and practitioners across Public Health Health Policy and Global Health as well as those with an interest in South African politics and development more generally The Open Access version of this book available at <http://www.taylorfrancis.com> has been made available under a Creative Commons Attribution Non Commercial No Derivatives CC BY NC ND 4 0 license
