Ark Diaspora Ark Asteroid Trilogy English Edition:

Ark Diaspora Thomas A. Cahill, 2013-08 Four years had passed since a massive asteroid collided with Earth and triggered an environmental disaster that obliterated nearly all forms of life Monumental tsunamis demolished coastal cities worldwide and a 3 600 mile long fissure incessantly belched out sulfuric smoke that girdled Earth enhancing and extending the asteroid induced dust pall that caused a new ice age In this forbidding world under an orange tinged sky small groups of humans managed to survive as the first book in this trilogy *Ark Asteroid Impact* describes Amid crushed buildings buried in snow on the beaches of California survivors at Halcyon pieced together the means to begin exploring the wounded world to see who else may remain Other survivors they rescued included NORAD personnel marooned in Colorado A Russian missile installation that intercepted their radio transmissions saw an opportunity to use thermonuclear weapons to assert world domination On the anniversary of the Bolshevik Revolution the canyons of the Central California coast rumbled and the sky erupted in a brilliant flash of light that jarred the American survivors from their sleep But the younger Russians revolted and repented *Forthcoming Books* Rose Army, 1990 **Ark Post-Asteroid Eden** Thomas A. Cahill, 2015-03-02 In the

aftermath of a cataclysmic collision of an immense asteroid with the Earth amid a decimated environment pummeled by the ravages of worldwide tsunamis volcanic eruptions and impenetrable ash clouds most forms of life succumbed Yet out of the rubble of the scorched scarred frozen planet a few groups of human stragglers managed to survive by seeking and improvising shelter One such group that took refuge on the Central Coast of California gradually agonizingly tenaciously discovered and nurtured remnants of mammal marine avian and plant life that they found As they salvaged equipment and fuel at sites that had been buried under snow and debris they developed capabilities to generate electricity restore vehicles communicate by radio build sailing ships and salvage and fly aircraft As their technological capabilities evolved these California colonists set out on increasingly wide sweeping expeditions through which they discovered other pockets of survivors who also had carved out a rugged existence in the few places on the shattered still smoldering landscape that were capable of sustaining existence The Californians discovered more about what had happened to the Earth how the rupture in the crust of the Earth had unleashed a toxic acidic volcanic soup that had made the oceans inhospitable to sea life destroyed much of the Amazon rain forest and triggered a new ice age that had been slowly transforming much of the planet into a frozen wasteland Yet a decade after the asteroid impact a decline in volcanic activity loomed as a bright spot on the horizon As volcanic eruptions decreased in intensity and frequency recovery began as sunlight began to penetrate the thinning ash clouds And although conflicts and power struggles still beset some groups of people most humans remained united in their common quest to create civilization anew But their best intentions appeared threatened when the world's largest super volcano began smoldering with increasing ferocity signaling an eruption that this time could annihilate the human race
