Reading, Writing, and Rigor Nancy Boyles,2018-04-12 What does rigor a word that frequently pops up in conversations about education really mean More specifically what does it mean for literacy instruction and how does it relate to challenging standards based assessments In this informative and practical guide literacy expert Nancy Boyles uses the framework from Webb s Depth of Knowledge DOK to answer these questions offering experience based advice along with specific examples of K 8 assessment items Boyles defines rigor and shows how it relates to literacy at each DOK level and explains the kind of thinking students will be expected to demonstrate She then tackles the essence of what teachers need to know about how DOK and its associated rigors are measured on standards based assessments Specifically

readers learn how each DOK rigor aligns with standards text complexity close reading student interaction the reading writing connection and formative assessment Teachers coaches and administrators will find clear guidance easy to implement strategies dozens of useful teaching tools and resources and encouragement to help students achieve and demonstrate true rigor in reading and writing *AI in Education and Educational Research* Francisco Bellas,Oscar

Fontenla-Romero,2025-08-05 This book constitutes the proceedings of the First International Workshop on AI in Education and Educational Research AIEER 2024 held in Santiago de Compostela Spain during October 19 20 2024 The 16 full papers presented in this volumes were carefully reviewed and selected from 23 submissions They focus on various aspects on AI applications in educational settings particularly emphasizing the integration of Large Language Models LLMs and explainable AI XAI *Argumentation Mining* Manfred Stede,Jodi Schneider,2022-06-01 Argumentation mining is an

application of natural language processing NLP that emerged a few years ago and has recently enjoyed considerable popularity as demonstrated by a series of international workshops and by a rising number of publications at the major conferences and journals of the field Its goals are to identify argumentation in text or dialogue to construct representations of the constellation of claims supporting and attacking moves in different levels of detail and to characterize the patterns of reasoning that appear to license the argumentation Furthermore recent work also addresses the difficult tasks of evaluating the persuasiveness and quality of arguments Some of the linguistic genres that are being studied include legal text student essays political discourse and debate newspaper editorials scientific writing and others The book starts with a discussion of the linguistic perspective characteristics of argumentative language and their relationship to certain other notions such as subjectivity Besides the connection to linguistics argumentation has for a long time been a topic in Artificial Intelligence where the focus is on devising adequate representations and reasoning formalisms that capture the properties of argumentative exchange It is generally very difficult to connect the two realms of reasoning and text analysis but we are convinced that it should be attempted in the long term and therefore we also touch upon some fundamentals of reasoning approaches Then the book turns to its focus the computational side of mining argumentation in text We first introduce a number of annotated corpora that have been used in the research From the NLP perspective argumentation mining shares subtasks with research fields such as subjectivity and sentiment analysis semantic relation extraction and discourse parsing Therefore many technical approaches are being borrowed from those and other fields We break argumentation mining into a series of subtasks starting with the preparatory steps of classifying text as argumentative or not and segmenting it into elementary units Then central steps are the automatic identification of claims and finding statements that support or oppose the claim For certain applications it is also of interest to compute a full structure of an argumentative constellation of statements Next we discuss a few steps that try to dig deeper to infer the underlying reasoning pattern for a textual argument to reconstruct unstated premises so called enthymemes and to evaluate the quality of the argumentation We also

take a brief look at the other side of mining i.e. the generation or synthesis of argumentative text. The book finishes with a summary of the argumentation mining tasks, a sketch of potential applications and a necessarily subjective outlook for the field.

Teaching and Learning Argumentative Writing in High School English Language Arts Classrooms George E. Newell, David Bloome, Alan Hirvela, 2015-06-05

Focused on the teaching and learning of argumentative writing in grades 9-12, this important contribution to literacy education research and classroom practice offers a new perspective: a set of principled practices and case studies of excellent teaching. The case studies illustrate teaching and learning argumentative writing as the construction of knowledge and new understandings about experiences, ideas, and texts. Six themes key to teaching argumentative writing as a thoughtful, multi-leveled practice for deep learning and expression are presented: teaching and learning argumentative writing as social practice; teachers' epistemological beliefs about argumentative writing; variations in instructional chains; instructional conversations in support of argumentative writing; deep learning and appreciation of multiple perspectives; contextualized analysis of argumentative writing; and the teaching and learning of argumentative writing and the construction of rationalities.
