Advances in the Assessment of Dietary Intake. Dale A. Schoeller, M. Westerterp, 2017-08-15 Diet is a major factor in health and disease. Controlled long term studies in humans are impractical and investigators have utilized long term epidemiological investigations to study the contributions of diet to the human condition. Such studies while valuable have often been limited by contradictory findings a limitation secondary to systematic errors in traditional self reported dietary assessment tools that limit the percentage of variances in diseases explained by diet. New approaches are available to help overcome these limitations and *Advances in the Assessment of Dietary Intake* is focused on these advances in an effort to provide more accurate dietary data to understand human health. Chapters cover the benefits and limitations of traditional self report tools strategies for improving the validity of dietary recall and food recording methods objective methods to assess food and nutrient intake assessment of timing and meal patterns using glucose sensors and physical activity patterns using validated accelerometers. *Advances in the Assessment of Dietary Intake* describes new avenues to investigate the role of diet in human health and serves as the most up to date reference and teaching tool for these methods that will improve the accuracy of dietary assessment and lay the ground work for future studies.

South Africa's Post-Apartheid Military Lindy Heineken, 2020-01-01 This timely book examines how the South African National Defence Force has adapted to the country's new security political and social environment since 1994. In South Africa's changed political state how has civilian control of the military been implemented and what does this mean for defence in a democracy? This book presents an overview of the security environment how the mission focus of the military has changed and the implications for force procurement force preparation force employment and force sustainability. The author addresses other issues such as the effect of integrating former revolutionary soldiers into a professional armed force the effect of affirmative action on meritocracy recruitment and retention military veterans looking at the difficulties they face in reintegrating back into society and finding gainful employment gender equality and mainstreaming the rise of military unions and why a confrontational instead of a more corporatist approach to labour relations has emerged. HIV AIDS and the consequences this holds for the military in terms of its operational effectiveness. In closing the author highlights key events that have caused the SANDF to become lost in transition and transformation spelling out some lessons learned. The conclusions she draws are pertinent for the future of defence security and civil military relations of countries around the world.
