High School Teacher Edition

Students often have difficulty understanding how to graph a system of linear inequalities. The key is to understand that the solution set is the region where the two inequalities overlap. This is the region where the two lines intersect. The solution set is the region where the two lines intersect.

$$y < x + 1$$

$$y > -x + 3$$

Activity 1: Investigating Graphing Systems

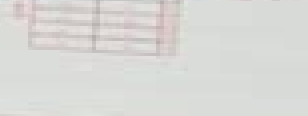

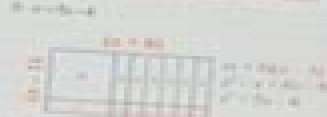

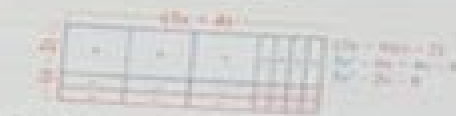

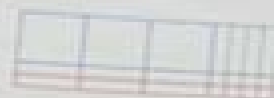

- Why does the graph of the system of linear inequalities have no solution? Explain how you know.

Why does the graph of the system of linear inequalities have no solution? Explain how you know.

- What if the system of linear inequalities had a solution? How would the graph look? What would the solution set be? Explain.

The graph of the system of linear inequalities has no solution. This is because the two lines intersect at a point where $y < 2$ and $y > 2$, which is impossible.

- What if the system of linear inequalities had a solution? How would the graph look? What would the solution set be? Explain.
