Algebra B Punchline 13:

Linear Algebra for the Young Mathematician Steven H. Weintraub, 2019-10-29 Linear Algebra for the Young Mathematician is a careful thorough and rigorous introduction to linear algebra It adopts a conceptual point of view focusing on the notions of vector spaces and linear transformations and it takes pains to provide proofs that bring out the essential ideas of the subject It begins at the beginning assuming no prior knowledge of the subject but goes quite far and it includes many topics not usually treated in introductory linear algebra texts such as Jordan canonical form and the spectral theorem While it concentrates on the finite dimensional case it treats the infinite dimensional case as well The book illustrates the centrality of linear algebra by providing numerous examples of its application within mathematics It contains a wide variety of both conceptual and computational exercises at all levels from the relatively straightforward to the quite challenging Readers of this book will not only come away with the knowledge that the results of linear algebra are true but also with a deep understanding of why they are true

Conversational Problem Solving Richard P. Stanley, 2020-05-11 This book features mathematical problems and results that would be of interest to all mathematicians but especially undergraduates and even high school students who participate in mathematical competitions such as the International Math Olympiads and Putnam Competition The format is a dialogue between a professor and eight students in a summer problem solving camp and allows for a conversational approach to the problems as well as some mathematical humor and a few nonmathematical digressions The problems have been selected for their entertainment value elegance trickiness and unexpectedness and have a wide range of difficulty from trivial to horrendous They range over a wide variety of topics including combinatorics algebra probability geometry and set theory Most of the problems have not appeared before in a problem or expository format A Notes section at the end of the book gives historical information and references
