Range:

Intercept(s) on y :

Table	
x	y

- What pattern do you observe in the table and graph of the linear function? For each point, the x -coordinate increases by 1 unit, the y -coordinate increases by 2 units, and y is positive.

Characteristics of Linear Functions

Characteristics of linear functions (slope, intercept, and range) have been addressed in previous math courses.

Source of Linear Equations

Standard Form:

$ax + by = c$, where a and b are positive values

Slope-Intercept Form:

$y = mx + b$, where m is the slope

Point-Slope Form:

$y - y_1 = m(x - x_1)$

Slope-Intercept Form

In the slope-intercept form, slope m describes the line's slope, and b (the y -intercept) affects the graph of the linear function.

Changes caused by m

- $m > 0$: no change in slope of passing function
- $m < 0$: no change in slope of passing function
- $m > 0$: no change in slope of passing function
- $m < 0$: no change in slope of passing function
- $m > 0$: no change in slope of passing function
- $m < 0$: no change in slope of passing function

Changes caused by b

- $b > 0$: no change in slope of passing function
- $b < 0$: no change in slope of passing function
- $b > 0$: no change in slope of passing function
- $b < 0$: no change in slope of passing function
- $b > 0$: no change in slope of passing function
- $b < 0$: no change in slope of passing function

Teaching and Learning High School Mathematics Charlene E. Beckmann, Denisse R. Thompson, Rheta N. Rubenstein, 2009-11-02 Too many high school students faced with mathematics in courses at the level of algebra and beyond find themselves struggling with abstract concepts and unwilling to pursue further study of mathematics When students curtail their course taking in mathematics they may be impacting their college and career options Thus high school mathematics teachers have the responsibility to help students recognize the value and importance of mathematics while also designing instruction that makes mathematics accessible to all students Ball and Bass 2000 as well as other mathematics educators have recognized that mathematics teachers not only need to know mathematics content and mathematics pedagogy i.e. teaching strategies but they also need to know how these ideas are integrated This mathematical knowledge for teaching is the knowledge that teachers of mathematics need and it differs from the knowledge that research or applied mathematicians must know This text is designed to provide teachers with insights into this mathematical knowledge for teaching Teaching and Learning High School Mathematics is likely different from many other texts that you have used It integrates both content and pedagogy to help you develop and build your own understanding of teaching The text is designed to help you develop deep conceptual understanding of fundamental mathematics Ma 1999 so that you are able to approach mathematics from multiple perspectives with many tools Such flexibility in teaching is essential if teachers are to help all students become mathematically proficient Throughout this book you are encouraged to work in

cooperative teams This strategy is designed to help you develop a mathematics learning community and build a professional network that will be a valuable resource during your professional career Hopefully you will experience the benefits of engaging in rich mathematical discussions with peers and consider how to encourage such learning environments in your own classrooms Lesson planning is another element pervasive throughout this text To help teachers plan for effective student centered lessons the Question Response Support QRS Guide is introduced in Lesson 1 1 and used throughout the remainder of the lessons The QRS Guide is a tool on which teachers may record tasks or questions Q for students expected and observed student responses R and teacher support S in the form of additional just enough questions to support students in their progress on the task In each unit teachers expand their repertoire of teaching and learning elements and strategies and incorporate these elements as they plan additional lesson segments In Unit 4 lesson planning is formally introduced as teachers put together elements from previous units into complete cohesive lesson plans *Resources in Education* ,2001-04

Moving Through Dimensions Clg Of William And Mary/Ctr Gift Ed,2021-09-03 Moving Through Dimensions approaches spatial reasoning through one dimensional two dimensional and three dimensional tasks designed for students in the middle school grades The unit also asks students to explore the transition between dimensions and representations of three dimensional objects in two dimensions This book includes pre and postassessments multiple reproducible materials and lessons based on NCTM standards Moving Through Dimensions was developed by the Center for Gifted Education at The College of William and Mary to offer advanced curriculum supported by years of research The Center s materials have received national recognition from the United States Department of Education and the National Association for Gifted Children and they are widely used both nationally and internationally Each of the books in this series offers curriculum that focuses on advanced content and higher level processes The science units contain simulations of real world problems and students experience the work of real science by using data handling skills analyzing information and evaluating results The mathematics units provide sophisticated ideas and concepts challenging extensions higher order thinking skills and opportunities for student exploration based on interest These materials are a must for any teacher seeking to challenge and engage learners and increase achievement Grades 6 8 **El-Hi textbooks in print** R. Lewis,Akihiko Takahashi,Shelley Friedkin,Nora Houseman,Sara Liebert,2025-08-22 Teaching Powerful Problem Solving in Math provides the first in depth portrait of schoolwide lesson study showing how U S teachers at several schools used it to implement powerful problem based mathematics instruction Students learn mathematics by confronting a novel problem and building the new understanding of the mathematical concepts needed to solve it just as mathematicians would By learning in this way students discover the power of their own thinking and gain confidence that extends well beyond mathematics This book introduces readers to urban elementary and K 8 schools where teachers have dramatically transformed math learning for teachers and for students Readers will follow teachers as they

transform instruction using schoolwide lesson study building powerful new ways for educators to learn from each other and practice innovative teaching techniques The authors use in depth classroom portraits from the outset of schoolwide lesson study and three years later to illuminate the changes in mathematics instruction at a school that raised its proficiency on Smarter Balanced Assessment from 15% to 56% Extensive resources and links are provided to help readers understand and build on the work of these schools which is grounded in established principles of collective efficacy intrinsic motivation and learner agency for both students and teachers Book Features Shows how teaching through problem solving can erase the achievement gap in mathematics learning Provides the first in depth portrait of schoolwide lesson study showing how U S teachers at several schools build it and use it to transform teaching Profiles teachers leading the transformation of instruction to achieve the ambitious vision of learning embodied in recent standards Uses photographs student work and detailed classroom descriptions to bring to life mathematics lessons in year 1 and year 4 of the school s work to build problem solving Provides examples and links to the strategies teachers use to make student thinking visible and actionable during mathematics lessons Includes lesson plans photographs of board work student journals school newsletters self assessment rubrics and dozens of links to the resources needed to begin using teaching through problem solving and school wide lesson study Provides long term teacher led solutions for professional learning and for mathematics instruction that have been shown to improve teacher retention and student proficiency *The Math Pact, High School* Barbara J.

Mathematics for the 21st Century Linda Huetinck, Sara N. Munshin, 2008 This third edition of Teaching Mathematics for

the 21st Century continues to help teachers let the secret out to open up to their students the wonderful discoveries and challenges of the pattern making and problem solving aspects of a fascinating subject mathematics The rationale remains the same to enable prospective and current teachers to access and use tools and strategies to effectively teach mathematics to contemporary students Changing demographics knowledge of how people learn and technology all impact the way we educate our young people This edition incorporates lessons and strategies from programs that have proven success in many types of classrooms Many of these examples help students connect mathematics to real life situations and communicate their understanding of the underlying concepts Although technology is constantly being upgraded ways to increase student motivation through its application remains a goal For example since applets can enhance a lesson whether the teacher uses a computer projector a smart board or has students work individually on computers we have identified several sources of mathematics applets that can be correlated to various lessons Research citations and summaries have been updated to reflect current information on teaching and learning For future teachers
