

Using [Replit](#) answer the following question:

Problem 2: CCSE Quiz Maker (35 points)

Your task is to develop a complete program that gives a quiz to the user. The quiz should ask the user the two questions listed below, one at a time:

- What three programming language are taught in CSE 1321L?
- What is the name of the bi-annual student showcase for CCSE?

The correct answers to these questions are "C#, Java, C++" and "C-Day" respectively. ██████████ you should print each question and the correct answer (along with three other incorrect choices), and then prompt the user to enter their answer choice. After the user gives their answer, let them know if they got the question right or wrong. If they enter an answer that was not listed, it is counted as wrong. Then, move on to the next question.

Once both questions have been answered, print out the user's final score (the total number of questions they answered correctly out of the two questions).
