Teacher's Choice Math Regents Review Henry Gu, 2010-03-12 Less is more When students have only six to eight weeks to review for the Regents exam and they have to remember so many topics what can the teacher offer to help They won't be able to review the 800 page textbooks or even the 400 page review books Our students need an efficient review kit that is concise yet contains all the important mathematical concepts and their applications This book will help students remember all the key topics and build their problem solving skills through the use of examples This review book is geared towards helping students succeed with high scores on the Regents exams I have already used these review sheets with my own Regents classes and I have seen firsthand that their performance is significantly higher than the statewide average Both teachers and students like these review sheets because they are practical This book contains three courses in one Integrated Algebra 1 Geometry and Algebra 2 Trigonometry It also serves as a handy reference guide for math teachers and college students

Polynomials and the mod 2 Steenrod Algebra Grant Walker (Mathematician), Reginald M. W. Wood, 2018 This is the first book to link the mod 2 Steenrod algebra a classical object of study in algebraic topology with modular representations of matrix groups over the field F of two elements The link is provided through a detailed study of Peterson's hit problem concerning the action of the Steenrod algebra on polynomials which remains unsolved except in special cases The topics range from decompositions of integers as sums of powers of 2 minus 1 to Hopf algebras and the Steinberg representation of $GL_n F$ Volume 1 develops the structure of the Steenrod algebra from an algebraic viewpoint and can be used as a graduate level textbook Volume 2 broadens the discussion to include modular representations of matrix groups
