Math is a comprehensive content rich PreK 12 curriculum that follows the focus and coherence of the Common Core State Standards in Mathematics CCSSM and carefully sequences the mathematical progressions into expertly crafted instructional modules. The companion Study Guides to Eureka Math gather the key components of the curriculum for each grade into a single location unpacking the standards in detail so that both users and non users of Eureka Math can benefit equally from the content presented. Each of the Eureka Math Curriculum Study Guides includes narratives that provide educators with an overview of what students should be learning throughout the year, information on alignment to the instructional shifts and the standards design of curricular components, approaches to differentiated instruction and descriptions of mathematical models. The Study Guides can serve as either a self study professional development resource or as the basis for a deep group study of the standards for a particular grade. For teachers who are new to the classroom or the standards, the Study Guides introduce them not only to Eureka Math but also to the content of the grade level in a way they will find manageable and useful. Teachers familiar with the Eureka Math curriculum will also find this resource valuable as it allows for a meaningful study of the grade level content in a way that highlights the coherence between modules and topics. The Study Guides allow teachers to obtain a firm grasp on what it is that students should master during the year. The Eureka Math Curriculum Study Guide Grade 8 provides an overview of all of the Grade 8 modules including Integer Exponents and Scientific Notation, The Concept of Congruence, Similarity, Linear Equations, Examples of Functions from Geometry, Linear Functions, Introduction to Irrational Numbers, Using Geometry. *The Learning Equation Pre-Algebra* Acerra, 2003-08. TLE is designed for learner focused computer classroom lab based and distance learning courses. Adopting institutions receive and have license to install all TLE courses on their campus computers even if they only adopt and have students purchase TLE for one section of one course. The pedagogical model employs a Guided Inquiry approach whereby students construct their own understanding of concepts. Instead of passively being fed information, students are actively involved in tasks requiring them to discover or apply mathematical concepts. The browser based course management system that accompanies TLE allows for the easy creation of algorithmically generated machine graded free response mathematics practice quizzes and tests, giving instructors the power to assess student understanding of skills in a more meaningful way. Because the testing and course management system is browser based, it can be used on a stand alone or networked computer or any computer with Internet access, giving instructors the power to access course management information such as student progress, time on task and grades anytime anywhere. Students working off campus can access TLE assignments using the Internet anytime. Adopting institutions may use Cengage Learning servers for course management at no additional cost.
