First, draw arrows to indicate the direction of blood flow through the heart. Draw the pathway of the oxygen-rich blood with red arrows, and trace the pathway of oxygen-poor blood with blue arrows.

Second, identify each of the elements of the intrinsic conduction system (numbers 1-5 on the figure) by inserting the appropriate terms in the blanks left of the figure. Then, indicate with green arrows the pathway that impulses take through this system.

Third, correctly identify each of the heart valves (numbers 6-9 on the figure) by inserting the appropriate terms in the blanks left of the figure, and draw in and identify by name the cordlike structures that anchor the flaps of the atrioventricular (AV) valves.

Fourth, use the numbers from the figure to identify the structures described below. Place the numbers in the lettered answer blanks.

Vermicomposting, 1998 **Gross Anatomy** William J.L. Felts, 2012-12-06 This is not a textbook Instead it contains what the author judges necessary to cope with questions relating to Gross Anatomy in board and licensure examinations Although material that has appeared recently on Part I National Board Examinations is covered simply listing and answering such questions certainly would not prepare you for the myriad possible alternatives Because of your successful background in anatomy the approaches used in a first year course are not necessary here Recall review and synthesis are the goals Please examine the entire book now to understand its organization and content and how they may serve your needs Throughout text is kept to a minimum The style size and boldness of type were chosen to aid the quick recognition of important items The illustrations essentially adaptations from blackboard drawings used by the author in reviews support the text in certain areas However the number of illustrations sufficient to make this an independent resource would defeat our purpose I assume you will consult your favorite atlas as you review and that you are experienced enough now to relate your reading to your own body A general table of contents follows this preface detailed tables of content precede individual chapters

Human Anatomy Frederic Martini, Michael J. Timmons, Robert B. Tallitsch, 2006 Features a large atlas style format appropriately detailed anatomical illustrations exceptionally clear photographs of tissues and cadavers and time saving study tools to give readers a complete understanding of anatomical structures
