The Parents' Guide to Clubfoot Betsy Miller, 2013-03-20 About one in every thousand babies born each year has clubfoot a disorder that affects foot and calf

muscles Because treatment usually begins soon after birth and continues for several years parents play a key role in the treatment of clubfoot and need to be able to communicate effectively with their child's doctor The Parents Guide to Clubfoot is the only book about clubfoot that is written for parents so they can learn everything they need to know about their child's condition It is an all in one resource with medical information advice from parents comments from clubfoot experts and even an illustrated story for preschoolers that parents can read aloud to their children Written in everyday language the book covers clubfoot in babies and older children from diagnosis through treatment for mild to severe cases It provides details on clubfoot its causes treatment and care along with an extensive list of resources and clubfoot assessment aids In keeping with currently preferred treatments in the U S it emphasizes the Ponseti method which minimizes surgery and includes perspectives from Ponseti trained clubfoot doctors and parents of children with clubfoot However separate chapters discuss all pre treatment and post treatment care options and one chapter covers surgery and post surgery care if it becomes necessary Parents often have a hard time coping with the diagnosis of clubfoot in their newborn children and this book reassures them that the condition is treatable If treated correctly the child's foot will look normal and he or she will be fully able to walk run and play Several world class athletes including Kristi Yamaguchi Troy Aikman and Freddy Sanchez were born with clubfoot The book includes advice from children with clubfoot that highlights the positive effects of having clubfoot as a child like getting presents after surgery and shows active pictures of them after their treatment As mentioned the Ponseti method of treatment once disregarded as quackery is the most common method of clubfoot treatment in the United States It involves a series of casts and braces that slowly reposition the foot To prevent a relapse these braces need to be worn until the age of four or five The book provides instruction advice and tips for caring for a child in a cast putting on the different braces required for the Ponseti method and solving common problems like bruising It also includes a useful list of signs that a child's foot is relapsing The three most important aspects of the book are 1 It reassures parents that clubfoot is treatable and that with the right treatment their child's foot will look normal and he or she will be able to walk run and play 2 It is important to find a doctor skilled in treating clubfoot with a nonsurgical approach This is called the Ponseti method after the late Dr Ponseti who developed it 3 Once a child's foot is corrected following through with brace wear as directed until the age of four or five is the best way to prevent a relapse in which the foot needs to be corrected again

The 15th International Conference on Biomedical Engineering James Goh, 2013-11-18 This volume presents the processing of the 15th ICMBE held from 4th to 7th December 2013 Singapore Biomedical engineering is applied in most aspects of our healthcare ecosystem From electronic health records to diagnostic tools to therapeutic rehabilitative and regenerative treatments the work of biomedical engineers is evident Biomedical engineers work at the intersection of engineering life sciences and healthcare The engineers would use principles from applied science including mechanical electrical chemical and computer engineering together with physical sciences including physics chemistry and mathematics to apply them to biology and

medicine Applying such concepts to the human body is very much the same concepts that go into building and programming a machine The goal is to better understand replace or fix a target system to ultimately improve the quality of healthcare With this understanding the conference proceedings offer a single platform for individuals and organizations working in the biomedical engineering related field to gather and network with each other in so doing create the catalyst for future development of biomedical engineering in Asia
