Interdisciplinary Solutions for Underserved Areas Jessica P. R. Thorn, Assane Gueye, Adam P. Hejnowicz, 2020-08-05 This book constitutes the refereed post conference proceedings of the 4th EAI International Conference on Innovations and Interdisciplinary Solutions for Underserved Areas InterSol 2020 held in Nairobi Kenya in March 2020 Due to the COVID 19 pandemic the conference is postponed to a later date in 2020 The 20 papers presented were selected from 50 submissions and issue different problems in underserved and unserved areas They face problems in almost all sectors such as energy water communication climate food education transportation social development and economic growth **Optimization**

Algorithms in Machine Learning Debashish Das, Ali Safaa Sadiq, Seyedali Mirjalili, 2025-05-20 This book explores the development of several new learning algorithms that utilize recent optimization techniques and meta heuristics It addresses well known models such as particle swarm optimization genetic algorithm ant colony optimization evolutionary strategy population based incremental learning and grey wolf optimizer for training neural networks Additionally the book examines the challenges associated with these processes in detail This volume will serve as a valuable reference for individuals in both academia and industry **Multi-Objective Combinatorial Optimization Problems and Solution Methods** Mehdi

Toloo, Siamak Talatahari, Iman Rahimi, 2022-02-09 Multi Objective Combinatorial Optimization Problems and Solution Methods discusses the results of a recent multi objective combinatorial optimization achievement that considered metaheuristic mathematical programming heuristic hyper heuristic and hybrid approaches In other words the book presents various multi objective combinatorial optimization issues that may benefit from different methods in theory and practice Combinatorial optimization problems appear in a wide range of applications in operations research engineering biological sciences and computer science hence many optimization approaches have been developed that link the discrete universe to the continuous universe through geometric analytic and algebraic techniques This book covers this important topic as computational optimization has become increasingly popular as design optimization and its applications in engineering and industry have become ever more important due to more stringent design requirements in modern engineering practice Presents a collection of the most up to date research providing a complete overview of multi objective combinatorial optimization problems and applications Introduces new approaches to handle different engineering and science problems providing the field with a collection of related research not already covered in the primary literature Demonstrates the efficiency and power of the various algorithms problems and solutions including numerous examples that illustrate concepts and algorithms Research Anthology on Artificial Neural Network Applications Management Association, Information

Resources, 2021-07-16 Artificial neural networks ANNs present many benefits in analyzing complex data in a proficient manner As an effective and efficient problem solving method ANNs are incredibly useful in many different fields From education to medicine and banking to engineering artificial neural networks are a growing phenomenon as more realize the plethora of uses and benefits they provide Due to their complexity it is vital for researchers to understand ANN capabilities in

various fields The Research Anthology on Artificial Neural Network Applications covers critical topics related to artificial neural networks and their multitude of applications in a number of diverse areas including medicine finance operations research business social media security and more Covering everything from the applications and uses of artificial neural networks to deep learning and non linear problems this book is ideal for computer scientists IT specialists data scientists technologists business owners engineers government agencies researchers academicians and students as well as anyone who is interested in learning more about how artificial neural networks can be used across a wide range of fields

Nature-Inspired Computation and Swarm Intelligence Xin-She Yang, 2020-04-10 Nature inspired computation and swarm intelligence have become popular and effective tools for solving problems in optimization computational intelligence soft computing and data science Recently the literature in the field has expanded rapidly with new algorithms and applications emerging Nature Inspired Computation and Swarm Intelligence Algorithms Theory and Applications is a timely reference giving a comprehensive review of relevant state of the art developments in algorithms theory and applications of nature inspired algorithms and swarm intelligence It reviews and documents the new developments focusing on nature inspired algorithms and their theoretical analysis as well as providing a guide to their implementation The book includes case studies of diverse real world applications balancing explanation of the theory with practical implementation Nature Inspired Computation and Swarm Intelligence Algorithms Theory and Applications is suitable for researchers and graduate students in computer science engineering data science and management science who want a comprehensive review of algorithms theory and implementation within the fields of nature inspired computation and swarm intelligence [Global Environment Outlook - GEO-6: Healthy Planet, Healthy People](#) UN Environment, 2019-06-06 Published to coincide with the Fourth United Nations Environmental Assembly UN Environment's sixth Global Environment Outlook calls on decision makers to take bold and urgent action to address pressing environmental issues in order to protect the planet and human health By bringing together hundreds of scientists peer reviewers and collaborating institutions and partners the GEO reports build on sound scientific knowledge to provide governments local authorities businesses and individual citizens with the information needed to guide societies to a truly sustainable world by 2050 GEO 6 outlines the current state of the environment illustrates possible future environmental trends and analyses the effectiveness of policies This flagship report shows how governments can put us on the path to a truly sustainable future emphasising that urgent and inclusive action is needed to achieve a healthy planet with healthy people This title is also available as Open Access on Cambridge Core *Handbook of Research on Emergent Applications of Optimization Algorithms* Vasant, Pandian, Alparslan-Gok, Sirma Zeynep, Weber, Gerhard-Wilhelm, 2017-10-31 Modern optimization approaches have attracted an increasing number of scientists decision makers and researchers As new issues in this field emerge different optimization methodologies must be developed and implemented The Handbook of Research on Emergent Applications of Optimization Algorithms is an authoritative reference

source for the latest scholarly research on modern optimization techniques for solving complex problems of global optimization and their applications in economics and engineering Featuring coverage on a broad range of topics and perspectives such as hybrid systems non cooperative games and cryptography this publication is ideally designed for students researchers and engineers interested in emerging developments in optimization algorithms
