Arguments for Learning Bill Cope,Walter Feinberg,2025-03-11 Almost every educational idea worth a thought has been considered at the University of Illinois and anything worth trying has been tested In this history of ideas Bill Cope and Walter Feinberg chronicle the intellectual lives of education thinkers at the university while tracking the development of educational ideas and practices in general Cope and Feinberg draw on conversations narratives and archival research that reveal how different generations explored their role in defining and carrying out the College s multifaceted mission Their account raises critical questions about the character of learning the aims of teaching and the nature of teaching as a profession At the same time the authors address issues that range from the role of schools in fostering individual and collective identity to the introduction of computer mediated and online learning Cope and Feinberg examine changes in self understanding about fundamental ideas and chart how the College evolved from its original narrow mission of training children s schoolteachers to embracing global perspectives A wide ranging portrait of an institution Arguments for Learning uses the School of Education to tell the stories of thinkers dedicated to the idea that education can change the world for the better

Encyclopedia of the Sciences of Learning Norbert M. Seel,2011-10-05 Over the past century educational psychologists and researchers have posited many theories to explain how individuals learn i e how they acquire organize and deploy knowledge and skills The 20th century can be considered the century of psychology on learning and related fields of interest such as motivation cognition metacognition etc and it is fascinating to see the various mainstreams of learning remembered and forgotten over the 20th century and note that basic assumptions of early theories survived several paradigm shifts of psychology and epistemology Beyond folk psychology and its na ve theories of learning psychological learning theories can be grouped into some basic categories such as behaviorist learning theories connectionist learning theories cognitive learning theories constructivist learning theories and social learning theories Learning theories are not limited to psychology and related fields of interest but rather we can find the topic of learning in various disciplines such as philosophy and epistemology education information science biology and as a result of the emergence of computer technologies especially also in the field of computer sciences and artificial intelligence As a consequence machine learning struck a chord in the 1980s and became an important field of the learning sciences in general As the learning sciences became more specialized and complex the various fields of interest were widely spread and separated from each other as a consequence even presently there is no comprehensive overview of the sciences of learning or the central theoretical concepts and vocabulary on which researchers rely The Encyclopedia of the Sciences of Learning provides an up to date

broad and authoritative coverage of the specific terms mostly used in the sciences of learning and its related fields including relevant areas of instruction pedagogy cognitive sciences and especially machine learning and knowledge engineering This modern compendium will be an indispensable source of information for scientists educators engineers and technical staff active in all fields of learning More specifically the Encyclopedia provides fast access to the most relevant theoretical terms provides up to date broad and authoritative coverage of the most important theories within the various fields of the learning sciences and adjacent sciences and communication technologies supplies clear and precise explanations of the theoretical terms cross references to related entries and up to date references to important research and publications The Encyclopedia also contains biographical entries of individuals who have substantially contributed to the sciences of learning the entries are written by a distinguished panel of researchers in the various fields of the learning sciences

The Vulnerability of Teaching and Learning in a Selfie Society Douglas Loveless,Cheryl L Beverly,Aaron Bodle,Katie S. Dredger,Diane Foucar-Szocki,Teresa Harris,Shin Ji Kang,Thall Jane B.,Phillip Wishon,2016-11-25 This book explores the generative power of vulnerabilities facing individuals who inhabit educational spaces We argue that vulnerability can be an asset in developing understandings of others and in interrogating the self Explorations of vulnerability offer a path to building empathy and creating engaged generosity within a community of dissensus This kind of self examination is essential in a selfie society in which democratic participation often devolves into neoliberal silos of discourse and marginalization of others who look think and believe differently By vulnerability we mean the experiences that have the potential to compromise our livelihood beliefs values emotional and mental states sense of self worth and positioning within the Habermasian system lifeworld as teachers and learners We can refer to this as microvulnerability that is those things humans encounter in daily life that make us aware of the illusion of control The selfie becomes an analogy for the posturing of a particular self that reinforces how one hopes to be understood by others What are the vulnerabilities teachers and learners face And how can we joker as Norris calls it the various vulnerabilities that we inherently bring into teaching and learning spaces In light of the divisive discourses around the politics of Ferguson Charlie Hebdo ISIS Ebola Surveillance and Immigration vulnerability offers an entry way into exhuming the humanity necessary for a participatory democracy that is often hijacked by a selfie mentality
