Education Outlook ,1892 *Advances in Ocean Exploration* Adam Soule,Daniel Wagner,Aurora Elmore ,Leila J. Hamdan,2024-09-20 The ocean covers more than 70% of the Earth s surface and encompasses 99% of its habitable volume yet is largely unexplored However new technologies approaches and a growing recognition of the ocean s role in sustaining the health wealth and security of modern society has spurred a rapid acceleration in ocean exploration and discovery Past ocean exploration efforts have fundamentally impacted our view of the bounds of life on the planet the human ocean relationship and the Earth s inner workings and many more discoveries yet remain The varied stakeholders for ocean

exploration are exemplified in many of the UN Ocean Decade challenges that require generating baseline knowledge to expose ocean regions and processes not yet constrained. As more of the deep ocean is explored, we gain important insight into scientifically and societally relevant questions including the distribution of ocean organisms and ecosystems, seafloor mineralization, chemical cycling, and the role of the oceans in global climate. Ocean exploration benefits from deep integration across disciplinary boundaries and careful coordination between stakeholders and explorers. This volume brings together scientists, engineers, and educators across disciplinary boundaries towards the common goal of mapping and characterizing unknown parts of the ocean. To meet the tremendous challenge of exploring the world's oceans will require the incorporation of new technologies and approaches that enhance the efficiency of exploration, adopt the latest developments in autonomy, and recognize the value of ocean exploration for society's benefit. This current topic provides an overview of the latest data results and innovations along with an assessment of the current gaps in ocean exploration in order to focus the community's efforts and enhance the spread of current innovations. We invite contributions that describe advances in ocean exploration including but not limited to: Assessments of and novel approaches to identifying exploration gaps and targets; Descriptions of novel vehicle systems that utilize autonomy and artificial intelligence to enhance ocean exploration; Development of new sensors and samplers that offer opportunities for scaling up ocean exploration and minimizing impact to ocean environments; Approaches to accessing difficult to reach and challenging subsea environments for exploration; The synergies of combining uncrewed systems with human expertise; New methods for analyzing and interpreting ocean data that create new scientific outcomes and enhance data use; Approaches to engaging a more diverse ocean exploration community including the indigenous communities adjacent to ocean exploration targets; Evaluations of ocean exploration impact on issues of high societal relevance.

Data, Governance and Narrative, Scott Edward Bennett, 2025-03-31. This book examines how participants in governance and public affairs use data and information in defining public problems and their solutions. It is based on 18 in-depth interviews with various kinds of participants in the public realm in Canada and the UK: from legislators, interest group representatives, journalists, and civil servants. Responses are examined against the backdrop of two classical perspectives on decision making. It explores the types of data respondents emphasized in their work and what model of decision making best reflected the realities of defining problems and selecting solutions in governance. The book demonstrates how there is a significant interplay between the long and short term aspects of governance. Narratives and data are inextricably intertwined in governance. The book explores the role of narratives in linking portrayals of the public good to problem definition and

solution creation It presents practical insights on how to approach generating and using data for the guidance of governing decisions the implications of various kinds of research designs and for the normative practice of governance *Why Science and Faith Belong Together* Malcolm A. Jeeves, 2021-02-25 As we try to understand ourselves and the world we live in all too often we look first to science and then if gaps remain in our understanding we try to fill the gaps with reference to God and our faith Such a god of the gaps approach has a long history and is sadly alive and well today This book was written to provide an alternative approach posing this basic question How can educated Christians maintain their intellectual honesty and at the same time be faithful both to Scripture and to science This book provides examples of some of the liveliest science vs faith issues today and suggests ways to think constructively about each of them The Journal of Education ,1927
