TOPIC 1: QUANTITIES AND RELATIONSHIPS Word Problems

Name _____ Date _____

PROBLEM SET 1: Identifying Independent and Dependent Quantities

1 Determine the independent and dependent quantities in each scenario. Be sure to include the appropriate units of measure for each quantity.

- 2 Isaura is driving on a long distance road trip. She travels an average of 60 miles per hour.

The number of miles Isaura drives depends on how long she drives.

Independent quantity: time (hours)
Dependent quantity: distance (miles)
- 3 Benjamin works at a printing company. He is making T-shirts for a high school volleyball team. The price he pays per shirt is 1.75 dollars per minute with the school's mascot.

- 4 For her job as a book restorer, Sophie purchases a small tin of coffee for \$4.25 from the coffee shop.
- 5 Philip makes bookshelves for his customers. At some of the less challenging locations, he can earn as much as 12 feet per minute.

- 6 Lisa prefers to walk to work when the weather is nice. She walks the 1.5 miles to work at a pace of about 3 miles per hour.
- 7 Liam works for a recycling company. Customers pay \$4.00 per pound to recycle a ton of cardboard boxes.

Researching and Understanding Educational Networks Robert McCormick,Alison Fox,Patrick Carmichael,Richard Procter,2010-06-25 In the twenty first century what could be more important than networks Such is the power of their influence and attendant technologies that it is unsurprising that our thinking about networks is permeated with images and metaphors from electronic networks This orientation may equally influence thinking about education whether that is of students or teachers Researching and Understanding Educational Networks extends the discussion of educational networks in a unique and novel way by relating it to teacher learning Following an investigation of teacher and school networks in the UK the authors found that theoretical perspectives taken from existing work on such networks were not adequate to provide

an understanding of their potential nor to provide the basis for researching them in ways that reflected the variety of teacher experience This book presents analyses of the problems with existing theories of teacher learning which for example draw on ideas of communities of practice and explores what network theories can be brought to the problem of how teachers and schools create and share new knowledge about practice Innovative networking theories discussed include social network analysis social capital theories actor network theory investigations of electronic networks including computer mediated conferencing how people learn at events such as conferences Researching and Understanding Educational Networks explores a new application of networks theories derived from quite different fields of work and extends it both by being concerned about networks beyond organisations and specifically about educational networks Their application to educational networks and to teacher learning in particular is a unique contribution of the book This enables it to be of interest to both researchers and those studying for higher degrees including students who are professionals working in schools
