Ansi licrc Smoke Damage Standard Guide:

Evaluating Residences Impacted by Smoke and Products of Combustion: Second Edition James

Lieberman, 2025-02-13 The intent of this handbook is to provide readers with the tools and in depth understanding of the science and professional judgment needed to conduct evaluations of residential living spaces single family homes apartments townhomes condominiums and similar that have sustained impacts from products of combustion smoke char soot and ash and the associated contaminants likely to be deposited within and on the residence This handbook will also strive to translate research observations and the results of sampling and analysis into useful impact classifications These classifications can be used to communicate the relative severity of the impact succinctly This handbook does what no others have attempted to do objectively link the level of contamination impact found to a minimum set of required remediation and restoration requirements needed to return the affected residence back to an environmentally safe and healthful condition Our methods combine structured recordings of observations and sampling with the principles of exposure banding Although the evaluation and assessment of impacted residences is an art and a science investigators will learn how to apply protocols questionnaires and checklists to accomplish the following conduct structured logical consistent and largely objective evaluations of residences impacted by smoke and products of combustion combine observations and sampling results into a coherent method of describing the impacts that the subject property has undergone use our defined requirements for collecting offsite and onsite information observations and sampling data to reproducibly select the appropriate impact category apply the appropriate contaminant screening levels to interpret the results from sampling use our exposure banding of impact categories to objectively link the level of contamination impact found to a minimum set of required remediation and restoration requirements needed to return the affected residence back to an environmentally safe and healthful condition We have identified authoritative screening guidelines and in some cases created scales from our own experience to ensure that any value obtained from our recommended sampling protocol can be appropriately interpreted and applied This handbook will empower you to conduct better evaluations of residences impacted by smoke and products of combustion In addition to learning why and how to accomplish these assessments this handbook contains the tools needed to show the value of pre remediation evaluations and clearance sampling to homeowners insurance companies and private adjusters Disaster Recovery Project Management Randy R. Rapp, 2011 The scope of disasters ranges from man made emergency to natural calamity from a kitchen grease fire to a hurricane or volcanic eruption It may be just one house that is destroyed or perhaps a whole infrastructure system is threatened While each type of event requires a very different scale and type of immediate response the project management challenges that face restoration and reconstruction professionals after the emergency phase is complete are remarkably similar Using insights acquired through decades of real world experience as well as from his academic research and teaching responsibilities the author explains pertinent requirements and methods for the

contractors and other professionals who bring order from chaos The first section of the book surveys the managerial skills required to confront the range of disasters that might be encountered and the different project environments involved The second section examines the details of project management and administration from materials management to health and safety The third and final section provides an overview of restoration techniques from restorative drying to debris management and demolition This is the first systematic presentation of the tools and skills needed for disaster recovery project management It is designed primarily for contractors both large and small firms although it will also be of value for those who might hire them the communities they serve and their organizational partners in the disaster recovery effort Those who are new to disaster restoration and reconstruction will find the volume particularly useful Focused on informing the management of projects that recover the built environment after emergency conditions sufficiently stabilise the volume supplements and complements books devoted to conventional construction or emergency relief management
