Making Sense of Mass Education Gordon Tait, 2013 *Making Sense of Mass Education* provides a comprehensive analysis of the field of mass education. The book presents new assessment of traditional issues associated with education: class, race, gender, discrimination, and equity. It dispels myths and assumptions about the classroom. It examines the complex relationship between the media, popular culture, and schooling, and places the expectations surrounding the modern teacher within ethical, legal, and historical contexts. The book blurs some of the disciplinary boundaries within the field of education, drawing upon sociology, cultural studies, history, philosophy, ethics, and jurisprudence to provide stronger analyses. The book reframes the sociology of education as a complex mosaic of cultural practices, forces, and innovations. Engaging and contemporary, it is an invaluable resource for teacher education, students, and anyone interested in a better understanding of mass education.
