CHAPTER 10 WORKSHEET
LOCATING THE EPICENTER OF AN EARTHQUAKE

Name _____

To figure out where an earthquake happened, you need to use the data recorded for the same earthquake from at least three seismograph stations. This data is recorded as a **seismogram**. You will also need a map, a ruler, a pencil, and a compass for drawing circles on the map.

Sample Seismograms:

Intervals are marked by the small lines printed just below the squiggles made by the seismic waves (the time may be marked differently by other seismographs). The distance between the beginning of the first P wave and the first S wave tells you how many seconds the waves are apart. This number will be used to tell you how far your seismograph is from the epicenter of the earthquake.

Mellehovitch, 2004 Bioterrorism poses a unique challenge to the medical care and public health systems Unlike an explosion or chemical attack which results in immediate and visible casualties the public health impact of a biological attack can unfold gradually over time Until a sufficient number of people arrive at the emergency rooms and doctors offices complaining of similar illnesses there may be no sign that an attack has taken place The speed and accuracy with which the doctors and laboratories reach the correct diagnoses and report their findings to public health authorities has a direct impact on the number of people who become ill and the number that die The nation's ability to respond to a bioterrorist attack therefore depends crucially on the state of preparedness of its medical care systems and public health infrastructure Public health experts have for years complained about the deterioration of the public health system through neglect and lack of funding They warn that the nation is ill equipped and insufficiently prepared to respond to a bioterrorist attack For example they point out that there are too few medical personnel trained to spot biological attacks a shortage of sophisticated laboratories to identify the agents and inadequate supplies of drugs and vaccines to counteract the threat They also contend that inadequate plans exist for setting up quarantines and emergency facilities to handle the sick and infectious victims Improving public health preparedness and response capacity offers protection not only from bioterrorist attacks but also from naturally occurring public health emergencies Public health officials are increasingly concerned about our exposure and susceptibility to infectious disease and food borne illness because of global travel ubiquitous food imports and the evolution of antibiotic resistant pathogens This book reviews critical issues in the US public system and its vulnerability or lack thereof to bioterrorism **Earthquakes** , 1997 Holt Science and Technology Holt Rinehart & Winston, 2004-02 **JAM IIT Geology Question Bank MSC Entrance** Mocktime Publication, The IIT JAM Joint Admission Test for Masters Geology code GG question bank designed for MSc entrance includes full sets of previous year papers available in PDF from 2005-2025 and topic wise questions mineralogy petrology structural geology paleontology stratigraphy applied geology etc PW Live The exam pattern for JAM Geology typically
