

Accounting Chapter 7 Notes: Liabilities

Current Liabilities

Current liabilities: obligations due within one year, or within the company's normal operating cycle if it is longer than one year.

Long-Term Liabilities: Obligations due beyond one year, or the company's normal operating cycle (*non-current liabilities*)

Current liabilities are of two kinds:

- Known amounts
- Estimated amounts

Current Liabilities of Known Amount

Short-Term Borrowings

A line of credit allows a company to access credit on an as-needed basis up to a maximum amount set by the lender

Accounts Payable Amounts owed for products or services purchased on credit

Accrued Liabilities [or Accrued Expenses] **Accrued Liabilities** [or **Accrued Expenses**]: results from an expense the business has incurred but has not yet been billed for or paid. Because accrued liabilities often arise from expenses, they are sometimes called *accrued expenses*.

- Salaries and Wages Payable
- Interest Payable
- Income Taxes Payable
- Interest Payable is the company's interest payable on notes, loans, and bonds payable. Income Taxes Payable is the amount of income tax the company still owes at year-end

Short-Term Notes Payable: are notes payable due within one year

Note: promissory notes from a lender's perspective, so we called them notes receivable. When we record these same notes in the borrower's books, they are notes payable

- **Example:** Robertson Construction Inc. may issue short-term notes payable to borrow cash or to purchase assets. For its notes payable, Robertson must accrue interest expense at the end of each reporting period. The following sequence of entries covers the purchase of inventory, accrual of interest expense, and payment of a short-term note payable:

	A	B	C	D	E
1	2020				
2	Oct. 1	Inventory	8,000		
3		Note Payable, Short-Term		8,000	
4		Purchase of inventory by issuing a six-month 10% note payable.
