E-Portfolios and Global Diffusion: Solutions for Collaborative Education Cambridge, Darren, 2012-02-29 As information is increasingly gathered online the issues surrounding the usefulness organization and interaction with electronic collection have grown in number and scope *E Portfolios and Global Diffusion Solutions for Collaborative Education* addresses the emerging requirements concerns and applications for e portfolios Through innovative chapters on real world business uses educational experiences ideal design this book fills an important gap in current literature concerning Web 2 0 applications The theoretical debate surrounding e portfolios is also presented along with international viewpoints providing an important contribution to the global discussion of representing knowledge in the 21st century Benchmarking and Workload

Definition Josephine L. Walkowicz, 1974 Benchmarking in Institutional Research Gary D. Levy, Nicolas A.

Valcik, 2012-12-21 While the term benchmarking is commonplace nowadays in institutional research and higher education less common is a solid understanding of what it really means and how it has been and can be used effectively This volume begins by defining benchmarking as a strategic and structured approach whereby an organization compares aspects of its processes and or outcomes to those of another organization or set of organizations to identify opportunities for improvement Building on this definition the chapters provide a brief history of the evolution and emergence of benchmarking in general and in higher education in particular The authors apply benchmarking to Enrollment management and student success Institutional effectiveness The potential economic impact of higher education institutions on their host communities They look at the use of national external survey data in institutional benchmarking and selection of peer institutions introduce multivariate statistical methodologies for guiding that selection and consider a novel application of baseball sabermetric methods The volume offers a solid starting point for those new to benchmarking in higher education and provides examples of current best practices and prospective new directions This is the 156th volume of this Jossey Bass series Always timely and comprehensive *New Directions for Institutional Research* provides planners and administrators in all types of academic institutions with guidelines in such areas as resource coordination information analysis program evaluation and institutional management

Performance Evaluation and Benchmarking Raghunath Nambiar, Meikel Poess, 2009-10-27 First established in August 1988 the Transaction Processing Performance Council TPC has shaped the landscape of modern transaction processing and database benchmarks over two decades Now the world is in the midst of an extraordinary information explosion led by rapid growth in the use of the Internet and connected devices Both user generated data and enterprise data levels continue to grow exponentially With substantial technological breakthroughs Moore's law will continue for at least a decade and the data storage capacities and data transfer speeds will continue to increase exponentially These have challenged industry experts and researchers to develop innovative techniques to evaluate and benchmark both hardware and software technologies As a result the TPC held its First Conference on Performance Evaluation and

Benchmarking TPCTC 2009 on August 24 in Lyon France in conjunction with the 35th International Conference on Very Large Data Bases VLDB 2009 TPCTC 2009 provided industry experts and researchers with a forum to present and debate novel ideas and methodologies in performance evaluation measurement and characteri tion for 2010 and beyond This book contains the proceedings of this conference including 16 papers and keynote papers from Michael Stonebraker and Karl Huppler *Hearing on the Nominations of Michael Dourson, Matthew Leopold, David Ross, and William Wehrum to be Assistant Administrators of the Environmental Protection Agency and Jeffery Baran to be a Member of the Nuclear Regulatory Commission* United States. Congress. Senate. Committee on Environment and Public Works,2017 *VET Boost: Towards a Theory of Professional Competencies* ,2009-01-01 The themes of the different papers in this book are related to five major areas of research First the book presents the work on a large scale assessment in vocational and occupational education and training Reason was the work of Frank Achtenhagen and his colleagues on the preparation of a VET PISA which started in 2004 which has now become more and more a concrete program The contributions to this part of the book contain a project description and profound presentations and discussions of measurement and evaluation problems It reflects also the work of Achtenhagen with respect to item response theory measurement and testing The second part of this book presents a unique endeavour of promoting VET research The Swiss Federal Office for Professional Education and Technology OPET initiated a program of Leading Houses of VET which are dedicated to different important research topics This program might serve as example for comparable approaches in other countries The third part highlights central issues of research on learning processes curriculum theory and the use of technology Here the work of Achtenhagen on competence profile modelling competence measurement and instructional and curriculum designing is touched The fourth part stresses social and emotional learning as important aspects of VET learning The fifth part considers the political and institutional dimensions of VET research which have to be taken into account when an international large scale assessment of VET shall be getting started Achtenhagen s work on learning at work leaning in economics and learning under the conditions of institutional modelling are discussed The whole book is a collection of central issues around a field that is not yet taken enough into consideration in educational research but pushed and supported by Frank Achtenhagen VET research He belongs to the founding fathers of it and this is why precisely the book reflects new trends and new concepts with respect to the question What can we educational psychologists and educational researchers learn from a rich and central research field

NBS Special Publication ,1974 *Numerical Solution of Stochastic Differential Equations with Jumps in Finance* Eckhard Platen,Nicola Bruti-Liberati,2010-07-23 In financial and actuarial modeling and other areas of application stochastic differential equations with jumps have been employed to describe the dynamics of various state variables The numerical solution of such equations is more complex than that of those only driven by Wiener processes described in Kloeden Platen *Numerical Solution of Stochastic Differential Equations* 1992 The present monograph builds on the above mentioned work

and provides an introduction to stochastic differential equations with jumps in both theory and application emphasizing the numerical methods needed to solve such equations It presents many new results on higher order methods for scenario and Monte Carlo simulation including implicit predictor corrector extrapolation Markov chain and variance reduction methods stressing the importance of their numerical stability Furthermore it includes chapters on exact simulation estimation and filtering Besides serving as a basic text on quantitative methods it offers ready access to a large number of potential research problems in an area that is widely applicable and rapidly expanding Finance is chosen as the area of application because much of the recent research on stochastic numerical methods has been driven by challenges in quantitative finance Moreover the volume introduces readers to the modern benchmark approach that provides a general framework for modeling in finance and insurance beyond the standard risk neutral approach It requires undergraduate background in mathematical or quantitative methods is accessible to a broad readership including those who are only seeking numerical recipes and includes exercises that help the reader develop a deeper understanding of the underlying mathematics
