Obstacles to Fairness in Criminal Proceedings John D Jackson, Sarah J Summers, 2018-03-22 This volume considers the way in which the focus on individual rights may constitute an obstacle to ensuring fairness in criminal proceedings The increasingly cosmopolitan nature of criminal justice forcing legal systems with different institutional forms and practices to interact with each other as they attempt to combat crime beyond national borders has accentuated the need for systems to seek legitimacy beyond their domestic traditions Fairness expressed in terms of the right to a fair trial in provisions such as Article 6 of the European Convention on Human Rights has emerged across Europe as the principal means of guaranteeing the legitimacy of criminal proceedings The consequence of this is that criminal procedure doctrines are framed overwhelmingly in constitutional terms the protection of defence rights is necessary to restrict and legitimate the state's mandate to prosecute crime Yet there are various problems with relying solely or predominantly on defence rights as a means of ensuring that proceedings are fair or legitimate and these issues are rarely discussed in the academic literature In this volume scholars from the disciplines of law philosophy and sociology challenge various normative assumptions underpinning our understanding of fairness in criminal proceedings
