Environmental Health Perspectives ,1993 **Methodologies for Community Health Assessment in Areas of Concern** ,2001 **Nitrogen Fixation** Peter M. Gresshoff,2012-12-06 We are witnessing an increased awareness of the earth s environment Examples are easily seen in the rise of Green Parties across Europe North America Australasia and lately Eastern Europe The public outcry following industrial mishaps in Alaska Chernobyl Basel and Bhopal as well as the renewed legislative activity such as the Clean Air Act in the USA and the European Community directive to member nation concerning the control of release of genetically engineered organisms are further examples of the general interest in the biosphere The Ozone hole Greenhouse gases and Genetically engineered Microorganisms have gained public profiles and are discussed widely in newspapers magazines and the electronic media A recent educational survey of nations belonging to the Organisation for Economic Co operation and Development OECD showed that school children are more literate with ecological terms as listed above than with pure scientific terms like phloem mitosis proton or Jurassic period Perhaps the increase in awareness is cyclical being fed by non scientific sociological and economic advances The late 1960s early 1970s saw a major increase in environmental consciousness Anti pollution groups were founded healthfood shops and naturopathy became acceptable as did recycling the use of lead free gasoline and the reduced usage of environmental toxins like DDT and PCB For example Monsanto Chemical Company instigated a self imposed halt to the manufacture of PCB in the mid seventies Chemical companies started to look at biodegradable herbicides slow release fertilizers and specifically targeted pesticides
