TKO Transponder Key Programming Tool

The TKO (Transponder Key Originator) and its predecessor (SDO) is a specially designed programming tool capable of adding new and removing existing Transponder keys (and key codes) in the vehicle's central computer. Security Professionals now have access to a unique tool for vehicles that do not support On-Board Programming procedures to add Transponder keys.

The TKO quickly and easily originates new keys even when the customer has lost all existing keys. Designed to fit the needs of North American automotive key makers, the TKO offers a range of features and vehicle compatibility unrivaled in today's market. The TKO also allows users to delete Transponder keys and diagnose potential transponder problems by communicating directly with the vehicle's immobilizer computer.

- Compatible with many vehicle brands
- Add or originate new transponder keys
- Delete lost or stolen keys
- Quick & easy to use
- OBD-II connection compatible
- Fully updatable

The days of turning away high yield automotive jobs are over, when you use the TKO.

Frequently Asked TKO Questions

Why do Security Professionals need a tool like the TKO?

The transponder key market has changed significantly. Early transponder keys could be duplicated (cloned) using tools or simply added to the vehicle's on-board computer by using On-Board Programming procedures. While these systems are still being used today, the market is shifting to a higher level of security. This security is being provided through encrypted transponder chips, which in some cases cannot be duplicated and do not have On-Board Programming procedures. In order for North American security pros to stay current with the automotive market, Kaba Inc. developed the TKO tool to allow programming of encrypted transponders.

What vehicles can be programmed using the TKO?

The TKO is capable of communicating with and programming transponder keys for many of the vehicles sold under the following brand names: Ford, Lincoln, Mercury, Mazda (including CX9), Volkswagen, Audi, Cadillac, Nissan (including Nissan Serial Reset), Infiniti, Mitsubishi, Toyota (including C-ARV), Lexus, Honda & Chrysler (including CAV 5&3) and Kia Amant.

What other features are available on the TKO?

Does the user need any specific operating software to run the TKO?

The TKO is a hand-held tool that does not require a personal computer for day-to-day functions. An exception to this is the Nissan BCM serial read which is installed on a personal computer for future access. A computer will be used for updating the TKO when new models are added, and features improved. The TKO requires connection either to the vehicle via the 12V cigarette lighter or the OBD-II data port. Further instructions regarding this point can be found in the TKO Owner's Manual.

Is there any reason a user who is not currently using transponder technology would be interested in the TKO?

The TKO is easy to use, but it is important that the operator understand operation and preferably have a working knowledge of transponder keys. This information is available through the TKO Owner's Manual. Kaba Inc. is committed to updating Security Professionals on the latest automotive technology and continues to conduct nationwide presentations and training classes.

What about updates?

Due to the ever-changing automotive security technologies, updates are necessary. Your sales representative or distributor will be informed of new releases and inform if you wish
