National Directory of Drug and Alcohol Abuse Treatment Programs, 2000 South Africa's Post-Apartheid Military
Lindy Heineken, 2020-01-01 This timely book examines how the South African National Defence Force has adapted to the country's new security political and social environment since 1994. In South Africa's changed political state, how has civilian control of the military been implemented and what does this mean for defence in a democracy? This book presents an overview of the security environment, how the mission focus of the military has changed and the implications for force procurement, force preparation, force employment and force sustainability. The author addresses other issues such as the effect of integrating former revolutionary soldiers into a professional armed force, the effect of affirmative action on meritocracy, recruitment and retention, military veterans looking at the difficulties they face in reintegrating back into society and finding gainful employment, gender equality and mainstreaming the rise of military unions and why a confrontational instead of a more corporatist approach to labour relations has emerged. HIV/AIDS and the consequences this holds for the military in terms of its operational effectiveness. In closing, the author highlights key events that have caused the SANDF to become lost in transition and transformation, spelling out some lessons learned. The conclusions she draws are pertinent for the future of defence security and civil-military relations of countries around the world. National Directory of Drug and Alcohol Abuse Treatment Programs 2003, 2003 *US-Chinese Strategic Triangles* S. Mahmud Ali, 2017-06-07 This book reveals the nature of Sino-US strategic competition by examining the influence exerted by major secondary stakeholders e.g. Japan, Russia, India, the Koreas and ASEAN on the two powers, USA and its rival China, who consider each other as a source of greatest challenges to their respective interests. By adopting strategic triangles as the analytical framework and assessing triangular relational dynamics such as US-China-Japan or US-China-Russia, the author illustrates how secondary stakeholders advance their own interests by exploiting their respective linkages to the two rivals, thereby shaping Sino-US competitive dynamics. This work adds a regional and multivariable perspective to the understanding of the Indo-Pacific's insecurity challenges. **SADC Gender Protocol 2018 Barometer** Morna, Colleen Lowe, Glenwright, Danny, 2018-08-20 The SADC Protocol on Gender and Development is the only sub-regional instrument in the world that brings together global and continental commitments to gender equality in one instrument used to enhance accountability. The health benefits associated with regular physical activity are now widely recognized. This book examines how social determinants such as race, ethnicity, socioeconomic status, sexual orientation and disability can impact on physical activity and its associated health outcomes. It explores the social, cultural, political and environmental factors that influence engagement in physical activity in a range of diverse populations and presents evidence-based, culturally appropriate strategies for targeting and promoting physical activity participation. Each chapter considers how the social determinants that impact on health are formed by the environments in which people live, work, learn and play. Incorporating a series of original case studies, this book analyzes physical activity behaviors in groups such as African Americans, Latinos, Asian Americans and Native Americans, military veterans and physically disabled populations, low-income populations, rural populations, LGBT populations. It also includes a variety of useful features such as key terms, summary points and critical thinking questions, as well as a chapter on international perspectives.

Marx in the Field Alessandra Mezzadri, 2021-02-15

Marx in the Field is a unique edited collection illustrating the relevance of the Marxian method to study contemporary capitalism and the global development process. Essays in the collection bring Marx to the field in three ways. They illustrate how Marxian categories can be concretely deployed for field research in the global economy; they analyse how these categories may be adapted during fieldwork; and they discuss data collection methods supporting Marxian analysis. Crucially, many of the contributions expand the scope of Marxian analysis by combining its insights with those of other intellectual traditions including radical feminisms, critical realism and postcolonial studies. The book defines the possibilities and challenges of fieldwork guided by Marxian analysis, including those emerging from the COVID-19 pandemic. The collection takes a global approach to the study of development and of contemporary capitalism. While some

essays focus on themes and geographical areas of long term concern for international development like informal or rural poverty and work across South Asia Southern and West Africa or South America others focus instead on actors benefitting from the development process like regional exporters larger farmers and traders or on unequal socio economic outcomes across richer and emerging economies and regions including Gulf countries North America Southern Europe or Post Soviet Central and Eastern Europe Some essays explore global processes cutting across the world economy connecting multiple regions actors and inequalities While some of the contributions focus on classic Marxian tropes in the study of contemporary capitalism like class labour and working conditions agrarian change or global commodity chains and prices others aim at demonstrating the relevance of the Marxian method beyond its traditional boundaries for instance for exploring the interplays between food nutrition and poverty the links between social reproduction gender and homework the features of migration and refugees regimes tribal chieftaincy structures or prison labour or the dynamics structuring global surrogacy Overall through the analysis of an extremely varied set of concrete settings and cases this book illustrates the extraordinary insights we can gain by bringing Marx in the field Baxter's The Foot and Ankle in Sport David A.
