Open and Distance Education in Asia, Africa and the Middle East Olaf Zawacki-Richter, Adnan Qayyum, 2019-02-18

This book is open access under a CC BY 4.0 license. This book describes the history, structure and institutions of open and distance education in six countries: China, India, Russia, Turkey, South Africa and South Korea. It describes how open and distance education is evolving in a digital age to reflect the needs and circumstances of the national higher education systems in these countries. It also explores the similarities and differences between how their open and distance higher education systems are managed and structured. This book is the second in a series following *Open and Distance Education in Australia, Europe and the Americas* (Springer 2018). Both books compare and draw conclusions about the nature of open and distance education in the context of various national higher education systems. In a digital era characterized by the growing use of online open and distance education, this book will prove particularly valuable for policy makers and senior administrators who want to learn about establishing or expanding open and distance education services. In addition, it offers a valuable reference guide for researchers, academics and students interested in understanding the different approaches to open and distance education.

Design Commons Gerhard Bruyns, Stavros Kousoulas, 2022-05-17. This book directly links the notion of the commons with different design praxes and explores their social, cultural and ecological ramifications. It draws out material conditions in four areas of design interest: social design commons and culture ecology and transdisciplinary design. As a collection of positions, the diversity of arguments advances the understanding of the commons as both concepts and modes of thinking and their material translation when contextualised in the domain of design questions. In other words, it moves abstract social science concepts towards concrete design debates. This text appeals to students, researchers and practitioners working on design in architecture, architecture theory, urbanism and ecology.
