Women Representation in Governance in Nigeria

Prof. Abubakar O. Sulaiman, 2025-06-16 Despite accounting for 49.47% of the Nigerian population progress towards gender equity and women's empowerment in Nigeria has remained low in contrast to the Sustainable Development Goals SDG Target 5.5. In light of this NILDS under the leadership of Prof. Abubakar O. Sulaiman and with support from the management of the National Assembly is creating a platform for intellectual discourse and engagements on women socio-economic and political empowerment. The NILDS International Conference on Women in Governance provided a platform for experts, government officials, policymakers and other relevant stakeholders across Africa to discuss the challenges that women face in political participation and governance in Nigeria and Africa at large. This ultimately led to this evidence-based scientific reader that contributes to the corpus of literature in Africa.

Physio-logging in Humans: Recent Advances and Limitations in Wearable Devices for Biomedical Applications

Mohammad Yavarimanesh, Colin K. Drummond, Cederick Landry, 2025-08-29 The recent advancements in wearables, nearables and machine learning have paved the way for unparalleled approaches to monitoring physiological parameters. These approaches show great potential in studying human physiology during daily life as well as in extreme conditions such as astronaut monitoring and human performance. In addition, wearables and recent advances in physio-logging can alleviate the impact of numerous diseases and medical conditions globally and therefore have the potential to reduce the cost of healthcare and increase patients' quality of life. Noteworthy strides have already been accomplished, evoking enthusiasm among patients and researchers alike, but very few wearable solutions have reached their anticipated potential due to many limitations such as sensor interoperability, fit, comfort, adverse reaction to wearables, lack of design standards and validation guidelines. By curating an article collection that brings together explored avenues to monitor physiological parameters that did or did not work, it is anticipated that further progress in the field can be accelerated.

Podmiotowość agentów programowych w ujęciu

teoretycznoprawnym Rafał Michalczak, 2024-12-18 W monografii zaprezentowano teoretycznoprawne rozważania nad podmiotowością agenta w programowych, czyli programach komputerowych, które dzięki zastosowanym technologiom z zakresu sztucznej inteligencji wykazują zachowania nazywane autonomicznymi. Mogą przyjmować postać na przykład programów gier, droidów lub programów odpowiedzialnych za sterowanie autonomicznymi pojazdami. Autonomia zachowania agenta w rodzaju problemów prawnych związanych z przypisywaniem odpowiedzialności za konsekwencje działań. Pierwszym celem rozprawy jest udowodnienie, że pojęciowe odróżnienie agenta od klasycznych programów jest uzasadnione, a w związku z tym dotychczasowe regulacje odnoszące się do programów nie odpowiadają na problemy specyficznie związane z agentami. Drugi cel to krytyczna analiza proponowanych w literaturze modeli rozwiązywania problemu w dotyczących przypisywalności odpowiedzialności prawnej. Koncentruje się ona na modelu upodmiotowienia agenta w programowych, postulując stworzenie nowej instytucji prawnej osoby elektronicznej oraz prezentuje zalety tego podejścia. Przedstawione poglądy i rozumowania stoją na wysokim

Romantic Dialogues and Afterlives Monika Coghen, Anna Paluchowska-Messing, 2020 Romantic writers often asserted

their individuality but this assertion tended to take the form of positioning themselves in relation to other authors and literary texts. Thus they implicitly acknowledged the rich network of broadly understood poetic dialogue as an important and potent source for their own creativity. When in 1816 John Keats wrote 'Great spirits now on earth are sojourning', he celebrated the originality of his contemporaries and the historical significance of his times, pointing to deep interest in the hum of mighty works in all the fields of human activity to which the nations ought to listen. Keats's sonnet suggests not only stimulating exchanges between poets, artists and social thinkers in the same language but also the idea of transnational appreciation and dialogue. The volume takes up this idea and explores the dialogues of Romantic authors within the wide scope of European and American cultures. Essays by scholars from Germany, Britain, Bulgaria, Poland, Canada and the United States of America examine Romantic writers' responses to their contemporaries, explore their dialogues with the culture of the past and their interactions across the arts and sciences. They also scrutinize the Romantics' far-reaching influence on later writers and artists and thus extend the network of artistic exchange to modern times. The volume offers a rich tapestry of interconnections that span across time and space, interlace languages and cultures and link Romantic writers and artists with their predecessors and successors across Europe and America. The essays in the collection invite the reader to join ongoing dialogues between writers and their audiences of the past and present.

Regional Innovation Patrick Dubarle, Yali Woyessa, 2016-06-01. This book provides an excellent analysis of regional innovation policy issues and developments with a wealth of examples, notably from OECD countries. Key policy areas such as clusters, support services and higher education institutions are well documented. The research methodology is founded on the experience accumulated by the authors over several decades in many different countries in the context of a world-class international organisation. This allows a good selection of policy-relevant examples and an experienced presentation of them. Jean Eric Aubert, Former programme manager, World Bank and OECD.

Orvosi hetilap, 1894. *Proud to be Deaf: Saintliness in the Catholic Deaf community in South Africa from 1874-1994* Mark James, 2025-05-15. This thought-provoking book details the history of Catholic ministry to the Deaf community in South Africa over 120 years. This history provides a backdrop to Deaf people's emerging understanding of themselves as a people imbued with dignity and having their own language and culture. The philosopher Emmanuel Levinas' understanding of saintliness, which is the ethical pursuit of prioritising one's neighbour's needs above those of one's own, provides a lens through which to both sympathetically and critically read this history. The book ends by paying tribute to the Deaf people in the Catholic Church who contributed significantly to raise Deaf people's awareness of

their innate dignity and of sign language as a gift from God The book inspires newness boldness and resilience in ministry to approach the Kingdom of God and encounter the face of Christ crucified crucified by the forces of phonocentrism and audism There are many lessons to be learnt that gives voice and appeal to what Ruben Xulu s image evokes Christ was Africa crucified In sum the book pronounces words of blessing to remember and sign a new journey together from the heart Associate Professor Glenn Morrison School of Philosophy and Theology at the University of Notre Dame Fremantle Australia
