Risk Evaluation and Management V.T. Covello, Joshua Menkes, J.L. Mumpower, 2012-12-06 Public attention has focused in recent years on an array of technological risks to health safety and the environment At the same time responsibilities for technological risk assessment evaluation and management have grown in both the public and private sectors because of a perceived need to anticipate prevent or reduce the risks inherent in modern society In attempting to meet these responsibilities legislative judicial regulatory and private sector institutions have had to deal with the extraordinarily complex problems of assessing and balancing risks costs and benefits The need to help society cope with technological risks has given rise to a new intellectual endeavor the social and behavioral study of issues in risk evaluation and risk management The scope and complexity of these analyses require a high degree of cooperative effort on the part of specialists from many fields Analyzing social and behavioral issues requires the efforts of political scientists sociologists decision analysts management scientists

Andersen, 2025-03-14 This brief examines Canadian police incident command response teams process of decision making during major critical and public order events It explores the different factors that influence how police Incident Commanders ICs approach their work and demystifies this work and how it is organized and operationalized The chapters in this book detail The basics of how incident command is structured in Canada How incident command models in Canada relate to those in other countries Overviews of the training and responsibilities for different incident command types First hand accounts of how ICs approach their work and feel about the decisions they have to make This book is ideal for practitioners and policymakers who are interested in how this mode of policing works It is also suitable for policing students in upper level criminology and criminal justice courses curious about this potential line of work
