General Relativity Conflict and Rivalries Galina Weinstein, 2016-01-14 This book focuses on Albert Einstein and his interactions with and responses to various scientists both famous and lesser known It takes as its starting point that the discussions between Einstein and other scientists all represented a contribution to the edifice of general relativity and relativistic cosmology These scientists with whom Einstein implicitly or explicitly interacted form a complicated web of collaboration which this study explores focusing on their implicit and explicit responses to Einstein's work This analysis uncovers latent undercurrents indiscernible to other approaches to tracking the intellectual pathway of Einstein to his general theory of relativity The interconnections and interactions presented here reveal the central figures who influenced Einstein during this intellectual period Despite current approaches to history presupposing that the efforts of scientists such as Max Abraham and Gunnar Nordström which differed from Einstein's own views be relegated to the background this book shows that they all had an impact on the development of Einstein's theories stressing the limits of approaches focusing solely on Einstein As such General Relativity Conflict and Rivalries proves that the general theory of relativity was not developed as a single coherent construction by an isolated brooding individual but rather that it came to fruition through Einstein's conflicts and interactions with other scientists and was consolidated by his creative processes during these exchanges
