Chapter 1

Accounting in Business

QUESTIONS

1. The purpose of accounting is to provide decision makers with relevant and reliable information to help them make better decisions. Examples include information for people making investments, loans, and business plans.
2. Technology reduces the time, effort, and cost of recordkeeping. There is still a demand for people who can design accounting systems, supervise their operation, analyze complex transactions, and interpret reports. Demand also exists for people who can effectively use computers to prepare and analyze accounting reports. Technology will never substitute for qualified people with abilities to prepare, use, analyze, and interpret accounting information.
3. External users and their uses of accounting information include: (a) lenders, to measure the risk and return of loans; (b) shareholders, to assess whether to buy, sell, or hold their shares; (c) directors, to oversee the organization; (d) employees and labor unions, to judge the fairness of wages and assess future employment opportunities; and (e) regulators, to determine whether the organization is complying with regulations. Other users are voters, legislators, government officials, contributors to nonprofits, suppliers, and customers.
4. Business owners and managers use accounting information to help answer questions such as: What resources does an organization own? What debts are owed? How much income is earned? Are expenses reasonable for the level of sales? Are customers' accounts being promptly collected?
5. Service businesses include: Standard and Poor's, Dun & Bradstreet, Merrill Lynch, Southwest Airlines, CitiCorp, Humana, Charles Schwab, and Prudential. Businesses offering products include Nike, Reebok, Gap, Apple, Ford Motor Co., Philip Morris, Coca-Cola, Best Buy, and WalMart.
6. The internal role of accounting is to serve the organization's internal operating functions. It does this by providing useful information for internal users in completing their tasks more effectively and efficiently. By providing this information, accounting helps the organization reach its overall goals.
7. Accounting professionals offer many services including auditing, management advice, tax planning, business valuation, and money management.
8. Marketing managers are likely interested in information such as sales volume, advertising costs, promotion costs, salaries of sales personnel, and sales commissions.

Weygandt, Terry D. Warfield, 2003-09-08 Intermediate Accounting is the bestselling book that has powered the careers of countless professionals. This new edition builds on the book's reputation for comprehensiveness, accuracy, and currency, incorporating all the recent changes to the accounting literature. Updated with the latest developments and standards in the field, the book includes a CD-ROM with an accounting cycle tutorial, a financial statement analysis primer, an annual report database, spreadsheet tools, career resources, and more. It will help readers develop the knowledge and skills base they need to succeed as professional accountants. Cost Accounting Problems (With Full Solutions), Why Diversity, Equity, And Inclusion Matter: Challenges And Solutions Bin Srinidhi, 2023-12-05 This book integrates the current research on diversity, equity, and inclusion with corporate practice and describes how these initiatives affect organizations' morale, performance, and output. Academic researchers, corporate executives tasked with implementing Diversity, Equity, Inclusion (DEI), and regulators face the problem of balancing DEI initiatives, which could generate diverse ideas beneficial to the organization, with concerns about diluting meritocracy. Building a diverse workforce could improve both organizational well-being and social harmony. Research has shown that building a diverse workforce often results in communication and coordination issues and unjustified pay and performance gaps, engendering feelings of exclusion among diverse individuals. The book describes how organizations address these issues in various settings, ranging from accounting firms to health care providers. It covers settings with gender and racial diversities and clarifies the difference between equality and equity. Its coverage includes dealing with concealable disabilities and promoting equity across diverse populations in organizational and social settings.
