rating agencies play an essential role in the modern financial system and are relied on by creditors and investors on the market. In the recent financial crisis their power and reliability were often questioned yet a simple rating downgrade could threaten to bankrupt a whole country. This book examines the governance of credit rating agencies as expressed by their ability to fairly ethically and consistently assign higher rates to issuers having lesser default risks. However factors such as the drive for increased revenue and market share, the inadequate business model, the inadequate methodology of assessing risk, opacity and inadequate internal monitoring have all been identified as critical governance failures for credit agencies. This book explores these issues and proposes some potential solutions and improvements. This will be of interest to researchers and advanced students of corporate finance, financial economics, risk management, investment management and banking.

Tax Evasion and the Law Sam Bourton, 2024-06-18. This book provides a critical and contemporary evaluation of the laws and enforcement policies pertaining to tax evasion in the United Kingdom (UK) and United States (US). Since the inception of taxes, revenue collection authorities around the world have attempted to address the seemingly perennial problem of individuals evading their tax liabilities. The financial crisis has shone a new light on the issue with an increased interest in using the criminal justice system as a means of addressing it. In the UK, in sharp contrast to the US, there is a strong record of prosecuting crimes of tax evasion whether committed by individuals or professional corporate facilitators. Providing an evaluation of the UK's tax evasion laws and enforcement policy through a comparative approach, this work highlights insights provided by the US experience. In so doing, the book explores the interconnections between tax evasion and money laundering, identifying best practices, omissions and areas for reform. The work will be a valuable resource for researchers, academics and policy makers working in the areas of financial crime, financial law, accountancy and criminal justice.
