Identification of Transactions Identify all financial transactions relevant to the business including sales purchases expenses revenues investments loans and any other financial activities

Documentation Obtain supporting documents for each transaction such as invoices receipts bills contracts bank statements and vouchers These documents serve as evidence of the transaction and provide details for recording it accurately

Classification Classify each transaction based on its nature such as revenue expense asset liability equity or equity distribution Proper classification ensures that transactions are recorded in the appropriate accounts in the accounting system

Recording in Journals Record each transaction in the appropriate journal or subsidiary ledger Common journals include the sales journal purchases journal cash receipts journal cash disbursements journal and general journal

Posting to General Ledger Transfer the transaction data from journals to the general ledger which contains all accounts used in the accounting system Update the respective account balances based on the debits and credits recorded in the journals

Trial Balance Prepare a trial balance periodically usually monthly or quarterly to verify that the total debits equal the total credits in the general ledger The trial balance helps in identifying any errors or discrepancies in the recording process

Adjustments Make adjusting entries at the end of the accounting period to account for accruals deferrals depreciation allowances and other adjustments required for accurate financial reporting

Financial Statements Prepare financial statements including the income statement balance sheet and cash flow statement based on the adjusted trial balance These statements provide a summary of the company's financial

performance and position during the period Closing Entries Close temporary accounts such as revenue expense and dividend accounts at the end of the accounting period by transferring their balances to the retained earnings or owner's equity account Audit and Review Conduct internal audits and reviews periodically to ensure the accuracy and reliability of financial records External audits may also be conducted by independent auditors for statutory compliance and verification Storage and Retention Maintain proper documentation and records of all transactions in compliance with legal and regulatory requirements Store financial records securely and retain them for the specified retention periods By following these steps businesses can ensure that their financial transactions are accurately recorded providing a reliable basis for decision making financial reporting and compliance with accounting standards and regulations
