and authoritative guide to effective teaching methods for the challenging task of teaching the epidural technique. Traditionally teaching this technique has relied on observation and hands on experience with a tutor. However the book proposes the use of simulators and other new tools to aid learning and explores methods of assessing learning outcomes. Additionally the volume editor draws on his 30 years of experience as a clinical teacher and current scientific studies to develop a comprehensive understanding of effective teaching methods. The book also discusses promising new tools such as virtual reality metaverse and eye tracking based teaching which have the potential to revolutionize the way medical professionals learn and practice clinical skills. By exploring these emerging technologies the book offers a forward looking perspective on the future of medical education. Overall this book is a valuable resource for those interested in teaching the epidural technique and for medical educators more broadly. Its consideration of new technologies makes it forward looking and provides insights into the future of medical education.
