

PART B — (5 × 16 = 80 marks)

11. (a) Discuss the characteristics requirements and the required mechanisms to realize the requirements of WSN. (16)
Or
(b) Discuss the potential applications of wireless sensor networks. (16)
12. (a) (i) Draw and explain the overview of sensor node hardware components. (8)
(ii) Discuss in detail about the concept of event-based programming. (8)
Or
(b) (i) Explain the need for gateways and also explain how internet and WSN communication can be established with a diagram. (10)
(ii) Describe the energy efficiency of WSN. (6)
13. (a) Give short notes on :
(i) Assignment of MAC addresses
(ii) Mediation device protocol. (8 + 8 = 16)
Or
(b) Explain in detail any two geographic routing protocols. (16)
14. (a) What is Sensor Tasking and Control? Briefly explain about task driven sensing and information based Sensor Tasking. (16)
Or
(b) Discuss in detail any two localization and positioning algorithms. (16)
15. (a) (i) List the factors that make the use of innovative development models particularly important. (8)
(ii) Explain the system architecture of a canonical wireless sensor node. (8)
Or
(b) (i) Write the inferences that can be drawn from power analysis of sensor nodes. (8)
(ii) Write the properties and the main design challenges of data dissemination protocols in a wireless sensor network. (8)

Anna University Wireless Network University Question Paper:

Ad Hoc and Wireless Sensor Networks Nami Susan Kurian, About Book The inspiration behind this book is when I felt that there is need of simplified book on Ad Hoc and Sensor Networks that can help the students to understand the concepts in an easy manner This book is written as per the latest Anna University syllabi Regulation 2017 This book contains five units which covers the whole syllabus Unit 1 Deals with the fundamentals of Ad hoc network and Sensor Network It also describes the different routing protocols for Ad Hoc Wireless Networks Unit 2 Provides an in depth knowledge on sensor network architecture and design issues Unit 3 Understands the MAC layer and transport layer issues It also describes the protocols used in MAC later and transport layer Unit 4 Illustrates the security issues possible in Ad hoc and Sensor networks Unit 5 Provides an exposure to mote programming platforms and tools At the end of every unit possible short answer and long answer questions are also given This book will be beneficial for the Engineering students as it helps in easy understanding of the concepts in best and easier way

Technology Road Mapping for Quantum Computing and Engineering Mishra, Brojo Kishore, 2022-03-25 Quantum computing is radically different from the conventional approach of transforming bit strings from one set of zeros and ones to another With quantum computing everything changes The physics used to understand bits of information and the devices that manipulate them are vastly different Quantum engineering is a revolutionary approach to quantum technology Technology Road Mapping for Quantum Computing and Engineering explores all the aspects of quantum computing concepts engineering technologies operations and applications from the basics to future advancements Covering topics such as machine learning quantum software technology and technology road mapping this book is an excellent resource for data scientists engineers students and professors of higher education computer scientists researchers and academicians

Neural Networks for Natural Language Processing S., Sumathi, M., Janani, 2019-11-29 Information in today s advancing world is rapidly expanding and becoming widely available This eruption of data has made handling it a daunting and time consuming task Natural language processing NLP is a method that applies linguistics and algorithms to large amounts of this data to make it more valuable NLP improves the interaction between humans and computers yet there remains a lack of research that focuses on the practical implementations of this trending approach Neural Networks for Natural Language Processing is a collection of innovative research on the methods and applications of linguistic information processing and its computational properties This publication will support readers with performing sentence classification and language generation using neural networks apply deep learning models to solve machine translation and conversation problems and apply deep structured semantic models on information retrieval and natural language applications While highlighting topics including deep learning query entity recognition and information retrieval this book is ideally designed for research and development professionals IT specialists industrialists technology developers data analysts data scientists academics researchers and students seeking current research on the fundamental

concepts and techniques of natural language processing
