rationalize and normalize violence which has often contributed to the acceleration and expansion of war Aimed at researchers and academics in the fields of accounting accounting history political management and sociology Accounting at War represents a unique and critical perspective to this cutting edge research field *Federal Register* ,2014 **The Customs Valuation Agreement** Mark K. Neville,2023-03-09 Global Trade Law Series Volume 58 Customs valuation is a key element in the corpus of international trade law Despite the facts that the WTO Valuation Agreement 1994 remains unchanged in all material respects and that it has been adopted by virtually every trading nation on the planet there are fissures in the system preventing consensus on many contentious questions This extremely knowledgeable analysis by a world renowned specialist lawyer in the field by concentrating on diverging views on the nature of the central feature of the Agreement the definition of the price actually paid or payable PAPP provides the most extensive study available of the origins and architecture of the Valuation Agreement and its intersection with transfer pricing norms Among much else the author fully explains differing views on such questions as the following criteria governing royalties and license fees acceptability of the First Sale for Export doctrine role of transport charges in valuing dutiable assists status of interest payments on deferred payments valuation of carrier media bearing software for data processing equipment inclusion or exclusion of transport charges in the PAPP status of the WTO s moratorium on electronic transmissions status of payments of money for tools and other materials used in producing the imported goods and status of international instruments of traffic The author expertly assesses interpretations of the Valuation Agreement as presented in the instruments of the World Customs Organization and in the administrative and judicial fora of the United States Canada and the European Union This matchless book takes a giant step toward real world consensus on the daunting questions of custom valuation Customs and international tax professionals as well as academic scholars will come away from its in depth coverage with an enhanced ability to discern the logic inherent in the Valuation Agreement a greater awareness of current trends and their origins in authoritative customs valuation bodies and improved confidence when approaching customs valuation questions *Appendix, Budget of the United States Government, Fy 2015* Executive Office Of The President,Office of Office of Management and Budget (U.S.),2014-04-15 Presents detailed information on individual programs and appropriation accounts that constitute the budget Includes for each Government department and agency the text of proposed appropriations language budget schedules for each account new legislative proposals and explanations of the work to be performed and the funds needed and proposed general provisions applicable to the appropriations of entire agencies or groups of agencies *Tainted Earth* Marianne Sullivan,2014-01-23 Smelting is an industrial process involving the extraction of metal from ore During this process impurities in ore including arsenic lead and cadmium may be released from smoke stacks contaminating air water and soil with toxic heavy metals The problem of public health harm from smelter emissions received little official attention for much for the twentieth century Though people living near smelters periodically complained that their health was impaired by both

sulfur dioxide and heavy metals for much of the century there was strong deference to industry claims that smelter operations were a nuisance and not a serious threat to health It was only when the majority of children living near the El Paso Texas smelter were discovered to be lead exposed in the early 1970s that systematic independent investigation of exposure to heavy metals in smelting communities began Following El Paso an even more serious lead poisoning epidemic was discovered around the Bunker Hill smelter in northern Idaho In Tacoma Washington a copper smelter exposed children to arsenic a carcinogenic threat Thoroughly grounded in extensive archival research *Tainted Earth* traces the rise of public health concerns about nonferrous smelting in the western United States focusing on three major facilities Tacoma Washington El Paso Texas and Bunker Hill Idaho Marianne Sullivan documents the response from community residents public health scientists the industry and the government to pollution from smelters as well as the long road to protecting public health and the environment Placing the environmental and public health aspects of smelting in historical context the book connects local incidents to national stories on the regulation of airborne toxic metals The nonferrous smelting industry has left a toxic legacy in the United States and around the world Unless these toxic metals are cleaned up they will persist in the environment and may sicken people children in particular for generations to come The twentieth century struggle to control smelter pollution shares many similarities with public health battles with such industries as tobacco and asbestos where industry supported science created doubt about harm and reluctant government regulators did not take decisive action to protect the public's health
