Structural Equation Modeling Approaches to E-Service Adoption Akgül, Yakup, 2019-04-19 With the modernization of services offered through the internet many traditional face to face services have adopted new e service phenomena Especially prevalent among the younger generations this change in service has promoted many industries to rethink how to best reach their consumers using modern technology Structural Equation Modeling Approaches to E Service Adoption is a pivotal reference source that aims to share the latest empirical research findings within technology acceptance information systems information technology human computer interaction and management information systems While highlighting topics such as e commerce internet banking and technology acceptance this publication explores the understanding of today s e services in a dynamic and complex environment as well as the methods within the field of information systems and information technologies This book is ideally designed for academics students managers and scholars interested in the up and coming research surrounding the field of information technology

Teaching Innovation in Architecture and Building Engineering David Bienvenido-Huertas, María Luisa de la Hoz-Torres, Antonio Jesús Aguilar Aguilera, 2024-06-19 This book presents contributions on teaching innovation in university architecture and building engineering studies The authors explain how the construction sector demands that future architects and building engineers have the knowledge and skills that allow them to meet the decarbonization objectives established by international organizations and that this causes the level of knowledge to be higher The contributors further discuss new technologies and the internationalization of studies presenting new challenges university studies must face This heterogeneity is represented in the chapters that make up this book developed by researchers from different countries The book is divided into three blocks i Active learning methodologies ii Innovative methodologies applied to learning process and iii Traditional vs Advanced Techniques The chapters of the book represent an advance in the current knowledge of teaching innovation techniques in university architecture and building engineering studies

Cooperative Compliance Jeffrey Owens, Jonathan Leigh Pemberton, 2021-08-18 National taxation authorities around the world are rapidly improving international cooperation given the unprecedented triple impact of persistent revelations of large scale corporate tax avoidance the ever increasing intricacies of digital cross border transactions and the unprecedented revenue deficits engendered by the COVID 19 pandemic There is also a growing recognition that improving tax compliance needs to be reconciled with a legitimate desire on the part of businesses to have some certainty about their taxes Cooperative compliance is one way to achieve that This first analysis of the details of cooperative compliance programmes currently in operation describes tax control frameworks suggests practical examples to assist practitioners in tax administrations and the private sector and provides multiple perspectives on the design and legitimacy of such programmes Drawing on detailed information contributed by tax practitioners and academics from a wide range of jurisdictions worldwide the book identifies and explains certain crucial elements of successful programmes the

criteria for access to cooperative compliance e.g. is the programme voluntary or mandatory? Is there a financial threshold? Will the criteria be publicly available? model legislation that can facilitate the operation of such programmes: statutory provisions, administrative rules and procedures etc. the foundations for an international agreement on an audit assurance standard for tax control frameworks including the role of the Organisation for Economic Co-operation and Development (OECD), the European Union (EU) and other international organizations how to develop a methodology to measure the cost and benefits of cooperative compliance programmes detailed case studies of existing compliance programmes in Australia, Austria, China, Germany, Italy, Poland and Russia and how to communicate a cooperative compliance programme to obtain trust from society. The analysis draws on two years of work led by WU Global Tax Policy Center (GTPC) at Vienna University of Economics and Business in cooperation with the International Chamber of Commerce (ICC) and the Commonwealth Association of Tax Administrators (CATA). The project brought together over two hundred people from 25 countries including public officials, businesses and academics. Tax certainty and predictability are key components for providing a tax environment that is conducive to cross-border trade and investment and in the long term it is in the interest of both governments and businesses to minimize tax uncertainty as much as possible. This truly helpful book promises to pave the way to an internationally effective tax framework that will be welcomed by taxation authorities and practitioners worldwide.
