 Price,2021 This book walks readers through the stages of the high school college prep pipeline that introduces interlocked  
 structural barriers to students The author shows how these barriers reinforce segregated structures that unfairly distribute  
 the public good of education to some students and not others Price argues that the college prep pipeline of Advanced  
 Placement and International Baccalaureate coursework in American high schools constitutes a new form of tracking in the  
 21st century Even further this new tracking introduces a facade of college readiness that veils the unequal learning  
 opportunities that send some students out into the college world with pockets full of counterfeit credentials that serve only to  
 reinforce the historically oppressive system Whether intentional or not this new form of tracking is embedded in schools  
 across the United States and have lifetime consequences for individual students that reinforce historically racial ethnic and  
 spatial inequalities This book is a rigorous and engaging portrait of the architecture of opportunity in American schools With  
 a fine grained analysis that never loses sight of the big picture Heather Price reveals structural realities of college readiness  
 in the United States that are ripe for change Sean Kelly University of Pittsburgh      **The Economics of Education** Steve
