EBOOK: Financial Accounting and Reporting: An International Approach Anne Marie Ward, Craig Deegan, 2013-03-16

Financial Accounting and Reporting An International Approach is an adaptation of McGraw Hill Australia's bestselling financial accounting text Australian Financial Accounting by Craig Deegan authored by Anne Marie Ward of Ulster University. Set within an international context with a solid grounding in IAS/IFRS, the book provides students with a detailed grasp of reporting requirements in an accessible and engaging manner. Up to date throughout and complete in theoretical and practical coverage, the book successfully communicates the detail necessary to understand, challenge and critically evaluate financial reporting. The result gives students a strong foundation for current study and their future professional lives. **SLA**

Research and Materials Development for Language Learning Brian Tomlinson, 2016-05-20 SLA Research and Materials Development for Language Learning is the only book available to focus on the interaction between second language acquisition theory and materials development for language learning. It consists of contributions written by experts in SLA, experts in materials development, researchers who have expertise in both fields, and introductions and conclusions by the editor. The book is organized into four major sections: position statements, materials driven by SLA theory, evaluations of materials in relation to SLA theory, and proposals for action that offer a diverse range of perspectives while maintaining a cohesive and comprehensive overview on the subject. This book is ideal for postgraduate courses in applied linguistics and second language acquisition and for researchers interested in the relationship between SLA and materials development.

Finance for Purchasing Managers Richard France, 2016-04-15 Managers involved at a senior level in the purchasing function require very particular financial skills. They need to analyse the financial health and stability of their suppliers' model, different cost and price scenarios, understand and manage budgets and be comfortable with the financial aspects of capital purchases. Finance for Purchasing Managers is written from this perspective using the buyer's language and interpretation. Richard France explores four key areas of expertise required of a buyer in today's environment: Financial analysis of suppliers (this includes understanding the financial aspects of a buyer's own organisation plus analysing key suppliers and how to use information to gain a negotiating edge), Pricing, costing and cost modelling (including costing methods and their application and how an understanding of these can give buyers a greater understanding when dealing with supplier quotations), Managing resources (including budgeting and sources of finance. This shows how budgets are drawn up and the importance of understanding the implications of the buyer's decisions on a supplier's cash flow forecast), Finally capital and revenue purchasing decisions and techniques covering standard investment appraisal techniques and how these can be used for deciding on the best deal from a choice of suppliers for both capital items as well as a standard long term parts supply contract. Finance for Purchasing Managers may be used to support the CIPS Level 6 Course Finance for Purchasers but also offers a readable and practical guide for those at a senior level in purchasing whether in the public or private sector.

Accounting: Business Reporting for Decision Making, 7th Edition Jacqueline Birt, Keryn Chalmers, Suzanne Maloney, Albie Brooks, Judy Oliver, David Bond, 2020-01-21 The seventh edition of Birt's Accounting textbook is designed for the core accounting unit in a business or commerce degree. Many students who plan to major in soft side disciplines such as marketing or human resource management need a clear and accessible text that emphasises the relevance of accounting to business. The Accounting interactive e-text features a range of instructional media content designed to provide students with an engaging learning experience. This includes practitioner videos from Ernst Young, animated work problems and questions with immediate feedback. Birt's unique resource can also form the basis of a blended learning solution for lecturers.

Principles of Management Peter Eichhorn, Ian Towers, 2018-01-10 This textbook presents an overview of how the activities of an organisation can be managed to satisfy the needs of stakeholders through the cost-effective, operationally efficient and sustainable transformation of resources into outputs. Taking an interdisciplinary approach, the authors show the relationship between management and economics and within this framework present the key areas of management activity. The book explains the connections between these areas and provides tools and instruments for successful management. The book's approach and content is relevant for all kinds of organisation: private or public sector, service or manufacturing, non-profit, large or small. Each chapter provides cases to illustrate what has been discussed and some questions to test comprehension. Throughout the book is a continuing project in which the reader is put in the position of owning their own business and must think and make decisions about what the chapter has discussed. The book combines Anglo-American and German approaches to management and management studies, making it a valuable resource both for those who are studying management and those who are working as managers.

Financial Management for Pharmacists Norman V. Carroll, 2007 This comprehensive, clearly written textbook teaches pharmacy students and pharmacists the basics of financial accounting, management accounting and finance and equips them with the financial skills needed in pharmacy practice. The Third Edition has been thoroughly updated with new content and realistic problems that allow students to apply what they have learned. This edition presents examples from diverse practice settings including HMO, hospital and long-term care pharmacies. A new chapter explains how decision analysis can be used to assist and inform decision making. The significantly revised pricing chapter provides additional consideration to demand and the interaction of unit costs, volume, demand and price.
